## A Peek at Our Week

**Wonders Reading Program:** This week our class will focus on the shapes we see in nature and in our neighborhood. Children will also be reading about the shapes they see around them.

**Vocabulary: materials, nature.** Invite your child to hunt for shapes found in nature or on materials. Then invite your child to draw pictures of each item. **High-Frequency Words:** Review: I, can, the, see, we, a. **Introduce: like.** Write the word *like* on paper and have your child trace it. Then say sentences and have your child write *like* each time you say the word. **Category Words: Shapes.** Say simple riddles that include different shape words. Have your child guess each object. **Phonics: Tt.** Invite your child to play a game of "I Spy." Say sentences and have your child find objects whose names begin or end with the letter t, such as *I spy a table. I spy a pot.* **Comprehension: Key details.** Invite your child to point out details in the park scene, such as a square sign. Then use different colored crayons to color each shape. **Math:** This week students will have further opportunities to compose numbers in different ways, count forward and backward, order numbers, explore patterns and directions, and build number racks!
