

Construction activity related to the Trans Mountain Expansion Project is underway in your region. Trans Mountain is monitoring the impact of construction on pipeline communities through a series of indicators identified in the Socio-Economic Effects Monitoring Plan. This construction impact information is gathered for each three-month period in a regional Socio-Economic Monitoring Report. Highlights from the quarterly regional report are provided here.

Go to transmountain.com/socio-economic-reports to view the complete Socio-Economic Monitoring Report for this region.

Noise and vibration from construction activity at Westridge Marine Terminal (WMT)

Trans Mountain will follow up on noise or vibration complaints related to construction activity at WMT. Trans Mountain will work with stakeholders to resolve and address such complaints where practical. Noise levels at the WMT construction site are monitored regularly and have remained within regulatory limits.

Traffic lighting at night

Trans Mountain understands there is increased traffic around the WMT during construction and lighting from vehicles or other activities may be perceptible for nearby residents at times. Construction activities mainly take place between 7 am and 8 pm Monday to Friday and from 9 am to 8 pm on Saturday to limit night-time disruption, and no work is planned on Sundays or statutory holidays.

Security presence

Safety and security of workers and the community are of utmost importance to Trans Mountain. Trans Mountain continues to implement its Security Plan as submitted to the National Energy Board.
