ONLINE SAFETY!

1

If in doubt, ask an adult that you trust to help you.

2

Never post anything that could upset anyone else.

3

Sharing is important, but not everything is meant to be shared.

4

Always think carefully before you post.

5

Friends are people that you actually know, not someone you have just met online.

6

Enjoy the web, but remember to stay in control as you would in the offline world.

7

Talk to your parents, teacher, or guardians if you feel uncomfortable with what you see on the internet.
