

As we aim to protect the health of everyone who enters our facilities and provide educational information for our industry and community, we are constantly updating our safety measures and learning opportunities. Below are our most recent additions:

- Required risk-screening for all entering HASC facilities - Questions are related to health and travel history. Effective March 30, 2020, per Texas State Governor Abbott's most recent executive order, the Houston Area Safety Council will not be admitting anyone **without a critical infrastructure worker letter** who has traveled in the past 14 days from the states of California, Louisiana, and Washington; as well as the cities of Atlanta, GA; Chicago, IL; Detroit, MI; and Miami, FL to any of our training or health testing locations to best protect our members and their employees.
- **Staff checkpoint** for handwashing and sanitizing prior to entering all facilities, and **masks provided to all staff** to comply with current CDC recommendations
- Complimentary micro-learning opportunities throughout our Pasadena campus regarding COVID-19 and pandemics with **coach-to-text testing options** to reduce time spent in the lab testing
- **CLEAN. DISTANCE. PROTECT.** handwashing and best practice badges for employees and trainees
- **Updated preventative measures and COVID-19 micro-learning videos** with the most current recommendation (links below)

Our medical team is continuously monitoring the CDC updates and will advise if circumstances and recommendations change. Follow our [website](#), [Facebook](#), [LinkedIn](#), and emails for real-time updates on what we are doing in response to COVID-19.
