

A Message from HASC

Due to the overwhelming success of our March COVID-19 webinar, we have scheduled a second webinar on Tuesday, April 28th with Dr. George L. Delclos and Dr. Robert J. Emery of The University of Texas Health Science Center at Houston School of Public Health that will be moderated by our Chief Medical Officer, Dr. Tommy Hysler. Join us to talk about COVID-19: Industry Impact and Moving Forward by registering here: <https://attendee.gotowebinar.com/register/5970648711869655820>.

The health and safety of our employees and industry are our utmost priority as we work to fulfill our mission of building safe workplaces. HASC has put proactive measures in place at all HASC locations in response to COVID-19, including a video illustrating all that is currently being done. We recently had Bob Borman, CIH, CSP, from HSE Solutions inspect our facility from an industrial hygienist perspective, as well as a glowing inspection from the local Public Health Department.

HASC will remain vigilant and proactive to work closely with HASC's medical team, as well as stay up-to-date on the most current recommendations to make necessary adjustments as needed. Our website (<https://www.hasc.com/covid-19/>) will stay updated with our most current practices and all current resources. We are considered an essential business and have received an exemption to remain open from Harris County Precinct 2 Commissioner, Adrian Garcia. HASC does not have any plans to close and will continue to operate with regular business hours at all training and occupational health center locations.

Be safe & stay healthy,
