

30 years of

BUILDING **SAFE** WORKPLACES

HASC hit a milestone of 30 years of building safe workplaces on September 25, 2020, and we are celebrating with a video series highlighting the past, present, and future of HASC.

Over these three decades, there have been more than a few highlights to share. Through innovation, collaboration, integrity, and a commitment to serve our industry well, we have been blessed with continued growth and the opportunity to bring training and occupational health services farther than we could have ever imagined in 1990.

We have a weekly series of videos highlighting HASC's journey over the last 30 years and will be capping the series off with exciting announcements centered on our continued commitment to serving industry and the vision of the future of our association.

Connect with us on Facebook and LinkedIn to follow along with the month-long celebration.

We hope you enjoy celebrating with us, and we look forward to serving industry over the next 30 years!
