Please contact Charity Dominguez at charity.dominguez@houstontx.gov or (713) 884-4459

Please note the following: This course will benefit personnel that work with or within an EOC or any other type of operations center. Previous course completion of IS-700, ICS-100 and ICS-200 is preferred, but not required.

Description

The Emergency Operations Center (EOC) Coordination and Planning Course will cover the following topics during the 3-day, classroom delivered, training course:

Situational Awareness and the Common Operating Picture for EOCs

The Situational Awareness and Common Operating Picture for Emergency Operations Centers is designed to build the situational awareness and common operating picture (SA/COP) skills, knowledge, and capabilities of responders supporting all-hazards response operations in the field and emergency operations centers. In addition to SA/COP instruction, the course also provides practical strategies and tools to synchronize workflow during the EOC action planning process (Planning P). The training is a combination of lecture, hands-on activities, and culminates with an innovative, emergency management board game that affords students the opportunity to apply the SA/COP principles and tools in a collaborative, teambuilding environment.

Emergency Operations Center (EOC) Coordination

This portion of the class provides EOC responders with instruction on EOC action planning within the construct of the SenseMakers EOC Coordination Playbook. Students are introduced to an EOC-tailored Planning P and the four-phased framework of EOC action planning. Students learn what each EOC section contributes to the EOC action planning process, how the EOC coordination playbook coordinates EOC workflow, and how to incorporate coordination tools (e.g. meeting agendas, battle rhythm, EOC-tailored ICS forms, etc.) into EOC action planning.
