

UNIMATE

Energy | Performance | Attitude
Elevated

Some days you feel on top of the world—you get things done and you feel great doing them. Unimate helps you have more days like that.

Developed from high-quality yerba mate leaves harvested and subjected to a patented 5-step process, Unimate contains up to 375 times more chlorogenic acids than other commercially available yerba mate drinks. With benefits that energize, boost athletic performance, and mood, the result is an all-around elevated quality of life.

FEATURES

- High quality yerba mate, purified to enhance efficacy
- Rich source of:
 - Chlorogenic acids
 - Theobromine
 - Mate saponins
 - Antioxidants
- Convenient single serving sachets
- Informed-Choice certified

BENEFITS

Supports feelings of well-being and relaxation*

Supports healthy cognitive processes*

Helps to maintain endurance and stamina*

Promotes satiety*

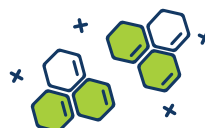

Supports weight management efforts*

Supports healthy cholesterol*

Promotes healthy digestion*

Promotes the body's natural production of ketones*

Supports overall metabolic health*

IDEAL FOR

Entrepreneurs, business people, parents:

Wherever life and work are happening, Unimate provides just the right amount of support to nail that afternoon presentation or finish all the household tasks and still help the kiddos with that project they just conveniently remembered was due tomorrow.

Athletes:

Provides stamina and performance benefits to get the most out of you. Whether working out or enjoying your favorite sport activity, Unimate helps you feel capable of accomplishing it all.

College Students:

Supports focus, concentration and motivation for successful habits and busy social lives.

USE

Mix one packet with 14-16 oz. of water.

Use once daily or as desired.

Drink with hot or cold water or try one of these customer favorite options.

RECIPES

Prepare your Unimate hot and stir with a cinnamon stick

Try adding a tablespoon of coconut oil to your Unimate

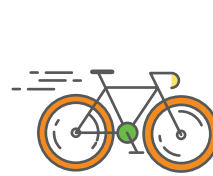

Add a tablespoon of Complete powder and Unimate becomes an even healthier, sweet treat

Try adding some lemon to your Unimate

Looking for an extra kick? A Matcha–Unimate combination should do the trick

WHEN TO DRINK

Before working out

In the morning as an alternative to coffee

As an in-between meal snack

Before an important meeting, test, or presentation when you want to feel your sharpest

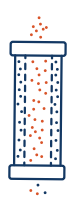

To combat afternoon brain fog or any time you're mentally tired

PRO TIP: Practicing intermittent fasting or adhering to Unicity's recommended 4-4-12 method? Drinking Unimate won't break your fast or disrupt benefits of the 4-4-12.

SCIENCE

Unimate is uniquely powerful thanks to a unique 5-step patented process. Beginning with handpicking and fire-roasting and followed by the extraction of active biological molecules, concentration and purification, this process results in up to 375 times more chlorogenic acids than other commercially available yerba mate drinks.

1 HANDPICKING > 2 FIRE-ROASTED > 3 EXTRACTION > 4 CONCENTRATION > 5 PURIFICATION

INGREDIENTS

Proprietary Yerba Mate Extract: Yerba mate is an herb traditionally used in a tea-like beverage that is consumed socially in South America. It is known to produce a calming effect while at the same time increasing energy and focus. The proprietary extract in Unimate amplifies these and other effects to create the totally unique Unimate experience. Yerba mate is a natural source of:

Chlorogenic acids - Promotes neuroprotective gene expression and has an antioxidant effect in the brain (JNK3, P38, NQO1). Promotes feelings of well-being. Supports healthy blood pressure and glucose levels. Promotes weight loss.

Mate saponins - Supports healthy triglycerides and the body's ability to burn fat.

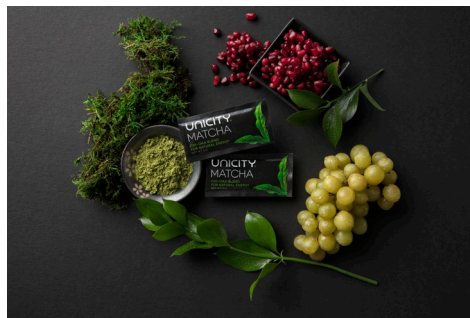

Theobromine - Supports healthy blood pressure and cholesterol levels, promotes feeling of calm, reduced mental fatigue, and improves focus.

GOES GREAT WITH

Bios 7

Bios 7 is a proven metabolic health product to keep your body, your gut and your wellness in balance.

Unicity Matcha

Unicity Matcha is a finely powdered green tea that gives your body the healthy boost it needs to increase your metabolism and physical energy.

LC Base

LC Base is a premium-quality meal replacement providing an ideal macronutrient ratio of healthy fat, muscle-building protein, and low carbohydrate.

UNIMATE FAQ

How much caffeine does each serving of Unimate contain?

Since natural ingredients can have some variation the amount of caffeine is not standardized. The product is tested for an upper limit and will have about as much as a cup of premium coffee.

Can I take Unimate with Unicity Matcha?

Yes, you can use both products at the same time or separately. Both do contain caffeine so sensitive individuals may wish not to drink together or before sleep.

How is this product different from Unicity Matcha?

Sometimes we focus on Unicity Matcha as energy for the body and Unimate as more of a mental energy. Matcha increases the amount of energy (ATP) that is produced resulting in more cellular energy. Unimate promotes improved mood, sense of well being and a feeling like you can accomplish anything. However, since Unimate also enhances ketone production, there are a number of benefits that come from using ketones for energy as well.

Why is this product not for use by pregnant or nursing women? Can kids use Unimate?

Unicity does not test products on children, or pregnant or nursing women, and therefore can not recommend use for these demographics.

What are chlorogenic acids?

Chlorogenic acids are a family of polyphenol compounds found in plants like yerba mate, green coffee beans, and tea. They have important biological effects that range from supporting healthy blood pressure to supporting healthy brain function and promoting improved mood. Unimate contains up to 375 times more chlorogenic acids than standard yerba mate.

What is Theobromine?

Theobromine is a molecule that is similar in structure to caffeine. It is perhaps best known as the mood-boosting molecule found in high quality-chocolate. Theobromine promotes feelings of calm, improves focus and reduces mental fatigue. Unimate has 3 times the amount of Theobromine as compared to the highest quality dark chocolate.

What are Mate saponins?

Mate saponins are a class of molecules called saponins that are specific to the yerba mate plant. Mate saponins have been shown to have important biological effects particularly in the realm of weight loss and supporting the body's ability to burn fat.

What is Informed-Sport certified?

Informed-Sport is an independent certification program that tests dietary supplements for substances commonly banned from use for athletes and confirms they've been manufactured under high-quality standards. Not only are the products tested, but the manufacturing facilities are also assessed to ensure that the risk of cross-contamination is limited. For more information, see informed-sport.com.

Is this product suitable for use on a ketogenic or similar diet?

Unimate is ideal for keto or low carb diets because it helps make our bodies more efficient at producing ketones, the body's quick energy source from fat. Unimate prevents that tired, empty, listless feeling that comes when we haven't had enough to eat because it helps our bodies use stored fat for energy to keep us going.
