Autumn 2018 Freshmen Enrollment June Update

INFORMATION

For information only.

BACKGROUND

An ongoing July report to the Board, this presentation updates and informs the Board on autumn 2018 freshman class enrollment projections across all three campuses. This enrollment information is preliminary, but will provide the board with a good indication of what the University can expect in the fall. Final enrollment information will be available after the autumn quarter “10 Day Census.”

This information focuses primarily on the freshman class. Transfer and graduate program admissions information will be available later in the summer after admission processes are complete. Detailed information will be provided to the Board in the fall.
