NOVEMBER  
REPORT

# 2019 NOVEMBER SYNOPSIS

For the month of November, our team is focused on assessing the needs of the student population by gathering quantitative and qualitative data through surveys, outreach and office visits in order for us to establish target points to measure our levels of success.

Upon collecting data points for fall quarter, our team's objective is to use it to establish impact reaching goals for Winter Quarter and Spring Quarter.

These past weeks, we have been honored to be visited by Regent Libby MacPhee and Student Regent Daniela Suarez, and also Representative Derek Kilmer. These meetings with them helped deepen their perspectives of UW Tacoma and our student experience here on campus!

Using the previous student governments (2018 - 2019) data collected last year, we have come up with projects that carry on their initiatives to this school year such as the affordable housing partnership.

For the month of November, we have started on two key initiatives (Food Truck Pilot Program & Husky Closet) that will directly benefit students engagement on campus as well as provide them tools for success. We have been in constant communication with City of Tacoma to better improve the safety of our crosswalks and our parking situation.
