

Dear researchers,

A new formulation of Sustained release buprenorphine is available from Fidelis Pharmaceuticals called Ethiq XR. The dosing is different than the current Zoopharm product, so please discuss with your protocol liaison in OAW.

Mouse dose: 3.25 mg/kg (0.05 ml per 20 gm)

Rat dose 0.65 mg/kg (0.1 ml per 200 gm)

Please note vial (3 ml, 1.3 mg/ml) is only good for 28 days after it is first opened.

For more information, ordering and pricing, see: <https://ethiqxr.com/>

A DEA number and researcher license is required for ordering.

VS will not stock this product at this time as it is more expensive than the Zoopharm product. However, depending on your needs, it may be less expensive for you to use.

Sincerely,

Vet Services Staff
