Next steps

Thanks for participating in the Husky Coronavirus Testing program powered by the Seattle Flu Study! You’ve taken an important step to help fight the spread of COVID-19. Here’s what you can expect next:

- Access your results within 1-2 days using your barcode and birthdate at: seattleflu.org/results.
- If your test is positive, UW Environmental Health & Safety will contact you. Stay home and isolated from others, even if you don’t have symptoms. Do not go to work or class.
- You won’t be contacted if your test is negative, but you can still view your results at seattleflu.org/results.
- You’ll receive a daily attestation email/text asking about your symptoms. If you have symptoms or were exposed to someone who does, we’ll coordinate next steps for retesting.

Stay healthy and fight the spread of COVID-19:

- Follow the three W’s: Wear a mask, Wash your hands and Watch your distance.
- Encourage others to sign up for Husky Coronavirus Testing. Anyone with a UW NetID can participate!
