

Another handy feature of Vidalyze is the ability to sync newly uploaded videos using the Vidalyze iPad app and make them instantly appear on the Vidalyze Web App for analysis. You will learn how to do this after completing this tutorial.

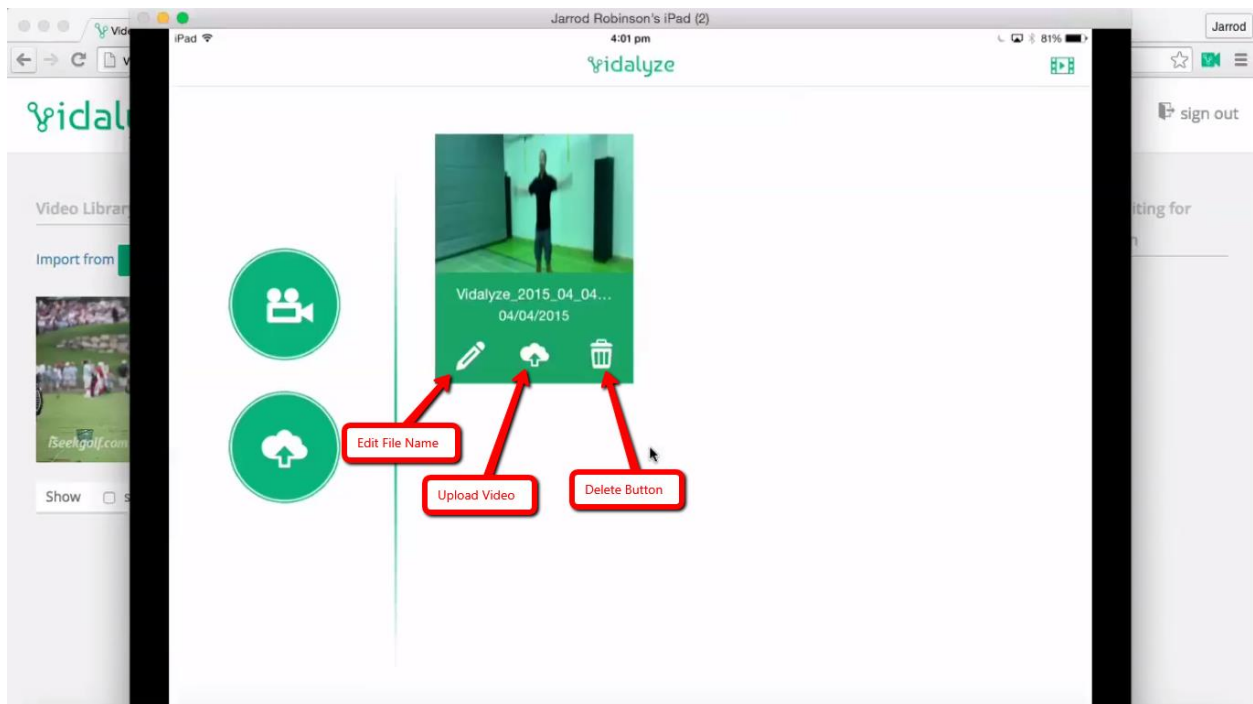

Step 1: Using your iPad, launch the Vidalyze App. From there, you can see three options; **Record Video**, **Upload a Video**, or **Import Videos** from your library.

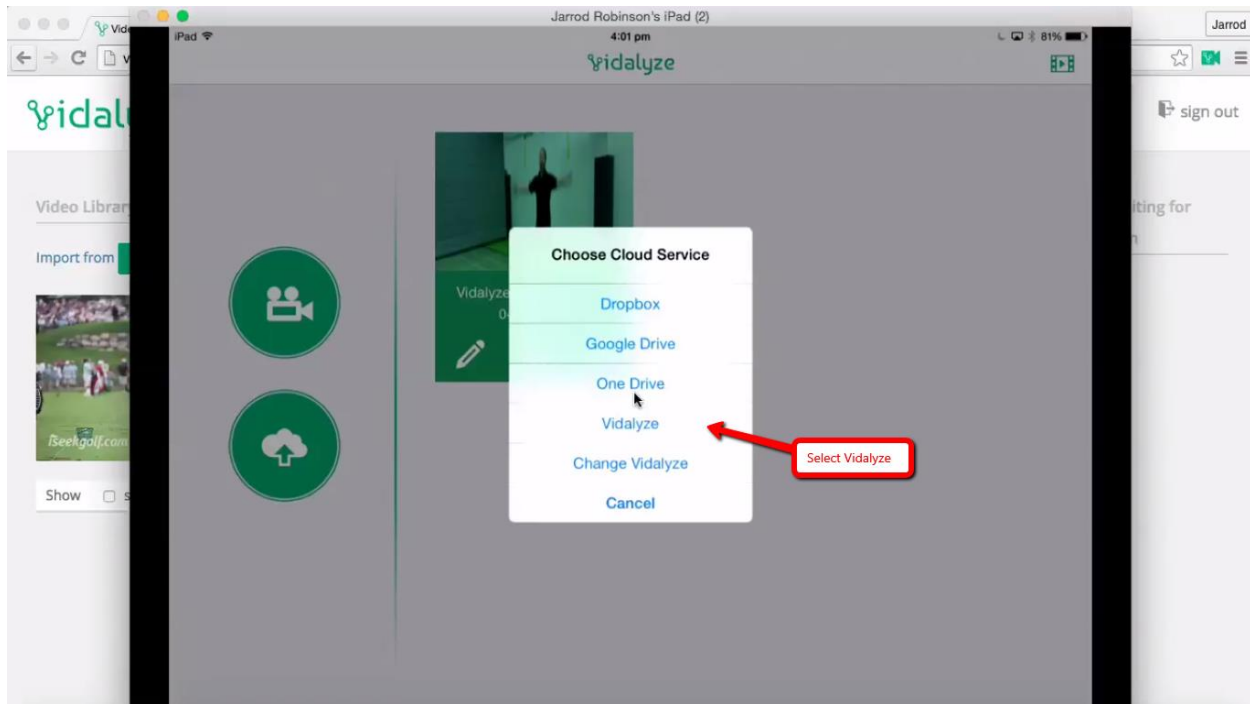

Step 2: Try clicking the **Import Videos** icon then select the video you want to import.

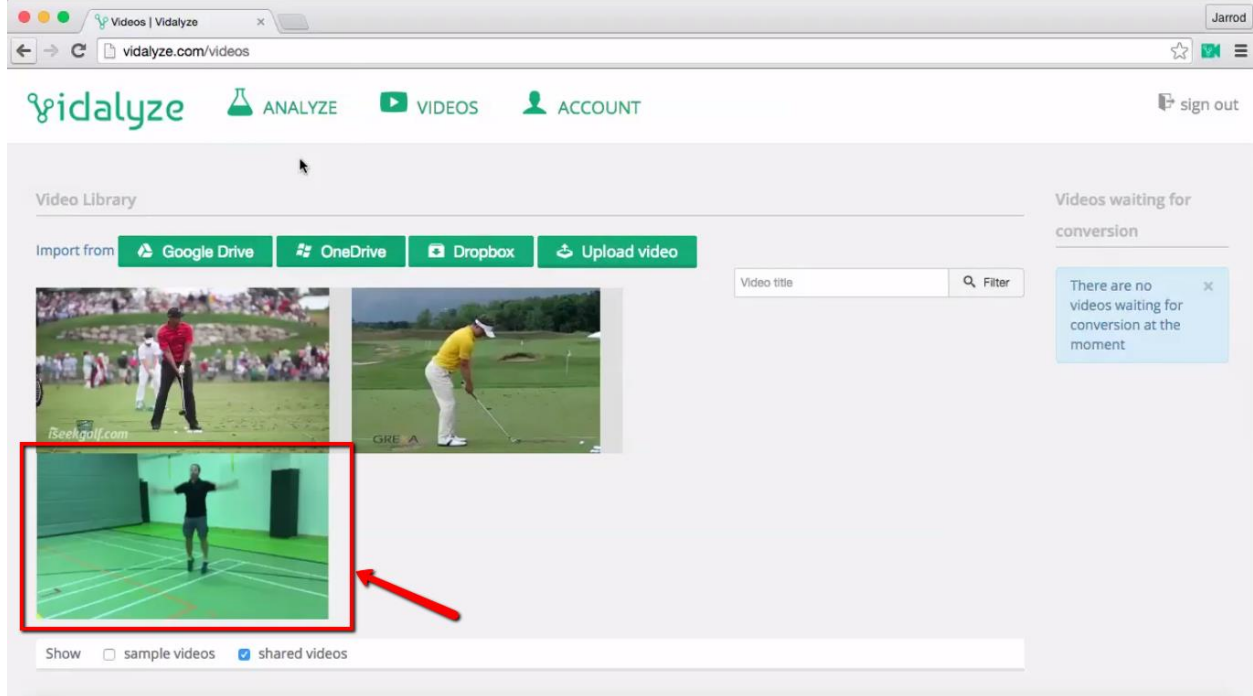

Step 3: You can see here that your selected video has been imported. You can also **Edit File Name** of your video, **Upload** your video, or **Delete** it if you like to. Now Click on the **Upload** button.

Step 4: After clicking the Upload button, you will be given several options on where you would like to upload your video. Now click on Vidalyze and it will now start uploading your video within your Vidalyze account.

Step 5: Now go back to your Vidalyze web app and refresh the page by pressing **F5** on your keyboard. You can now see that the newly uploaded video in the iPad app is now in your Vidalyze account and ready for analysis.

Step 6: When you put your mouse over the video. It will display a **Share Video** button from where you could choose who can access see this video.
