

This tutorial teaches you how to link videos together for analysis using Vidalyze.

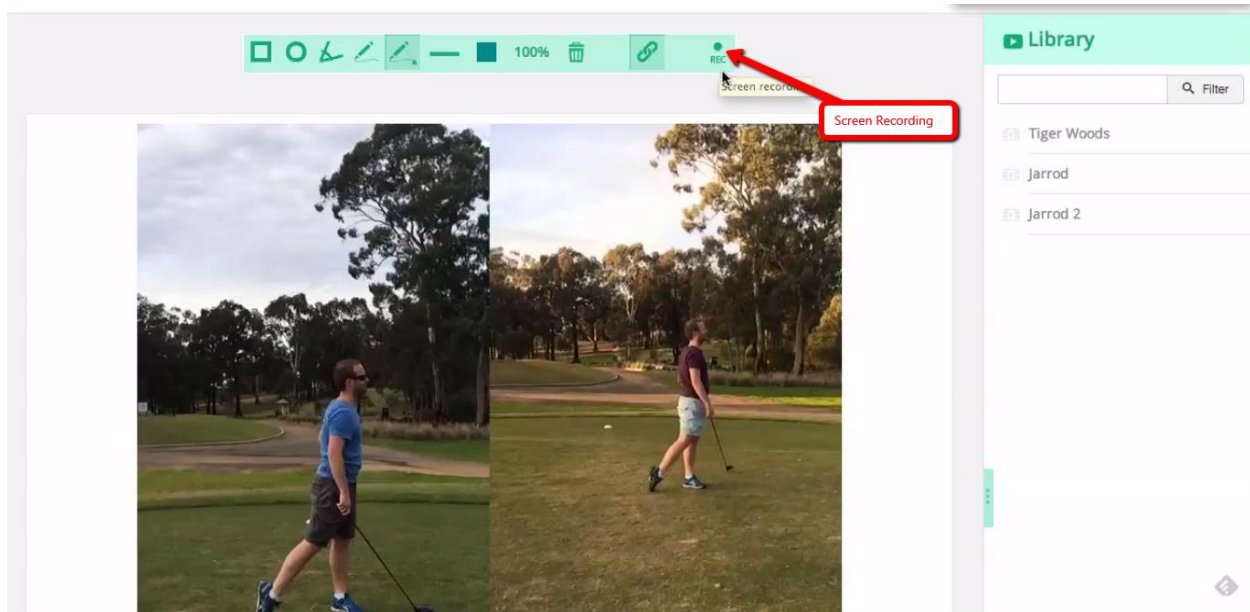

Step 1: Click on the **Link** Icon located at the top of your video.

Step 2: You'll observe that the frame bar on every video has been converted to one as shown in the screenshot. You can then change frame rate accordingly and play the video.

Step 3: You can also try recording your screen by clicking the **Rec** button at the top and start recording.

Step 4: To view your recorded video. Click on **Account** and it will direct you to your dashboard where you can see **My Recordings**. Click on this and it will display the videos you have recorded.
