

VidBuilderFX

General Walkthrough:

- Open the VidBuilderFX app on your computer and login to your account of VidBuilderFX.

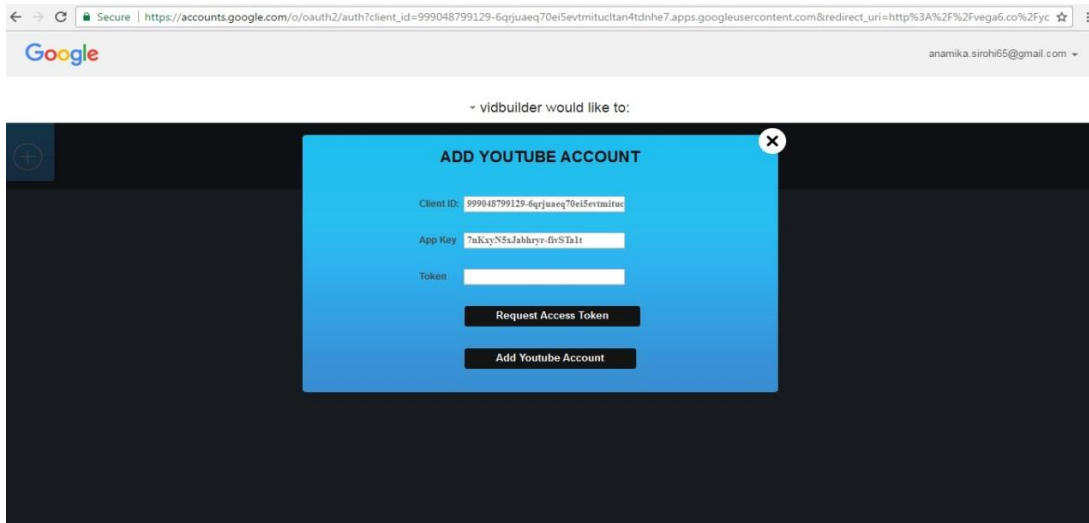

- After successful login, a dialogue box will appear which asks you to connect with your Facebook account.

Enter your Facebook account credentials and click on 'Log In' button.

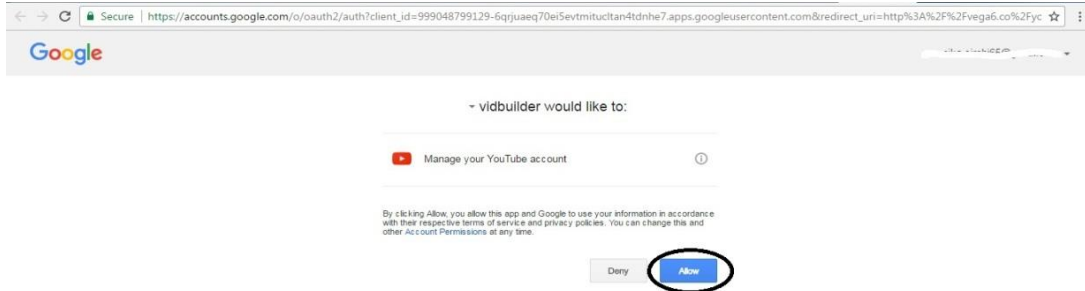

- Next, another dialogue box will appear to connect to your YouTube account.

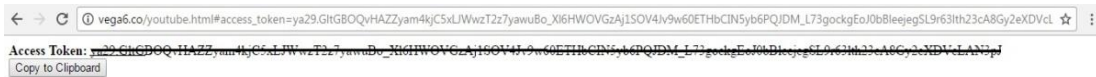

You need to enter the token ID in order to be able to post your videos to YouTube. In case if you don't want to connect to YouTube at this stage, then you can close this dialog box and add the details later on even.

How to generate Token ID for YouTube:

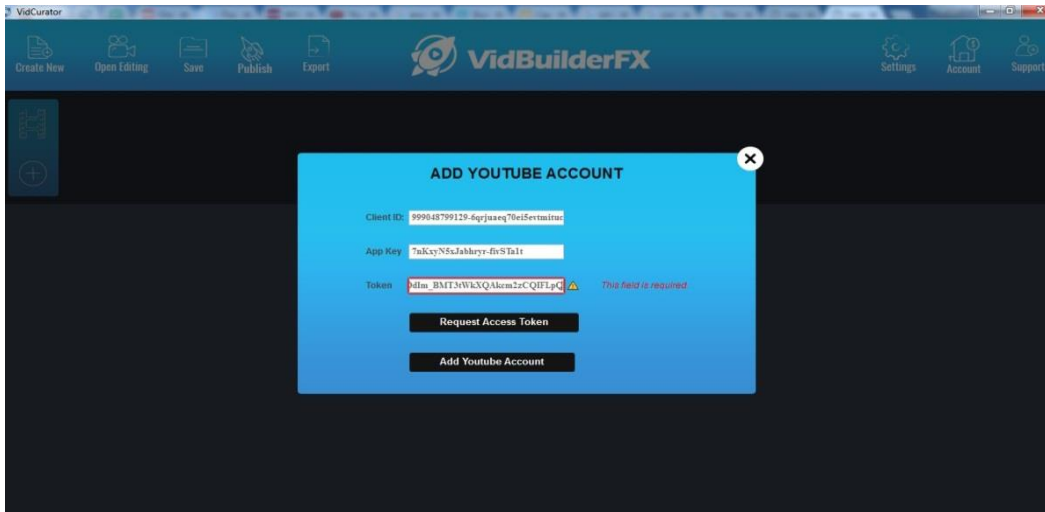

- On clicking the 'Request Access Token' button, a new window will appear that will ask you to allow this app to use your accounts information.

- On clicking the 'Allow' button, a unique access token gets generated.

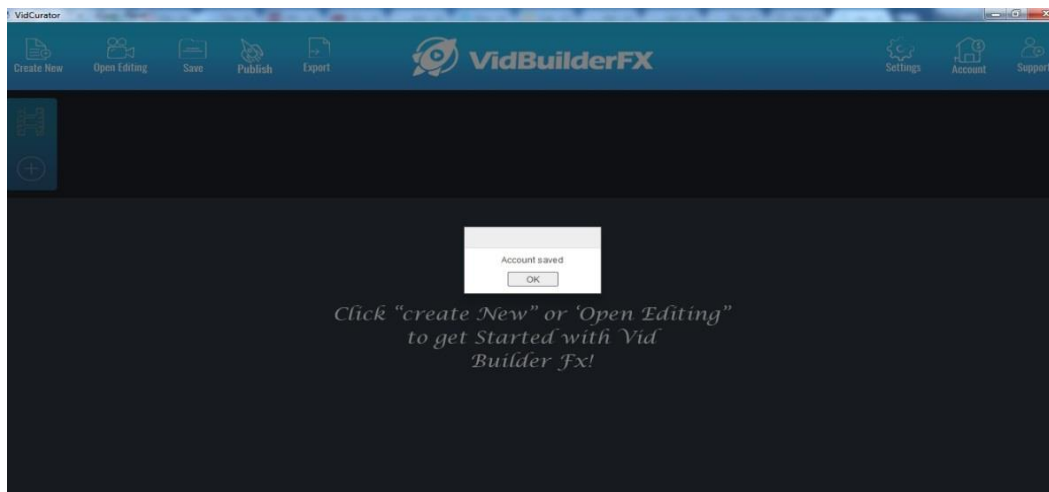

- Copy your Token ID and paste it in text area field of 'Token' in 'Add YouTube Account' dialogue box.

You have successfully created the token.

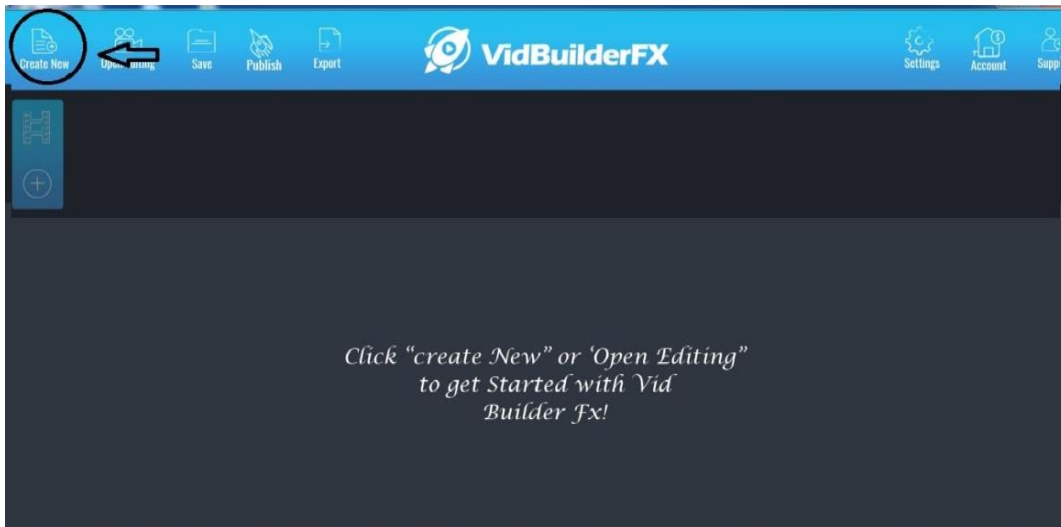

Further moving,

- Click on 'Add YouTube Account' button. A confirmation alert box will appear telling you that your account saved, just click 'ok'.

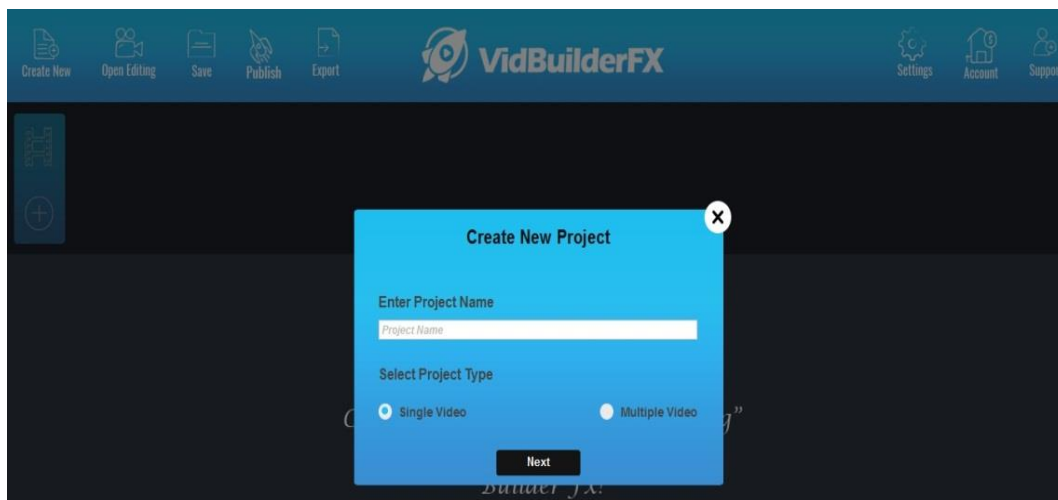

Create New:

- Once you are done with connecting Facebook and YouTube accounts, the VidBuilderFX dashboard will appear. Click on 'Create New' icon to create the new project.

- As you click on 'Create New' icon, a new dialogue box will appear.

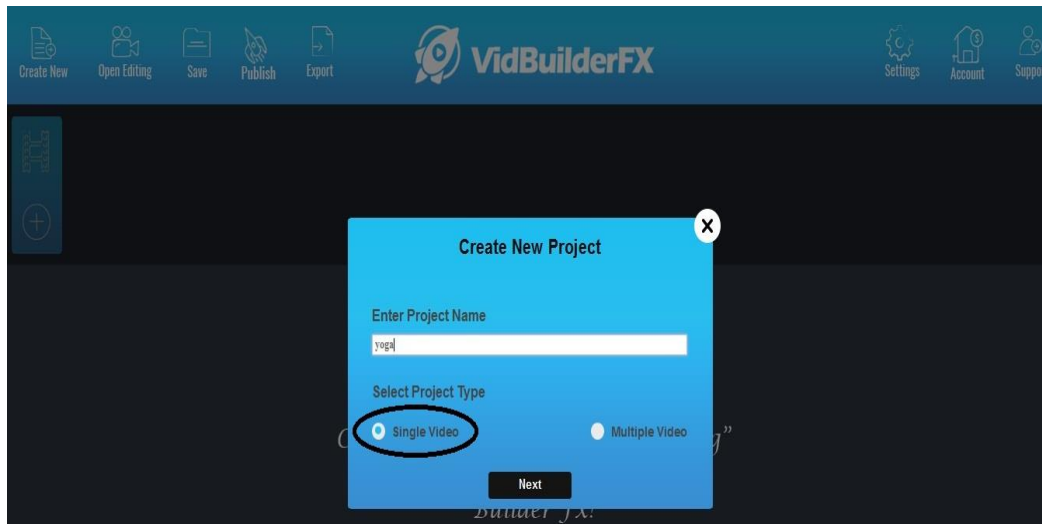

- Enter the project name. There are two radio buttons to select project type. For single video creation, select 'Single Video' radio button and 'Multiple Video' radio button otherwise.

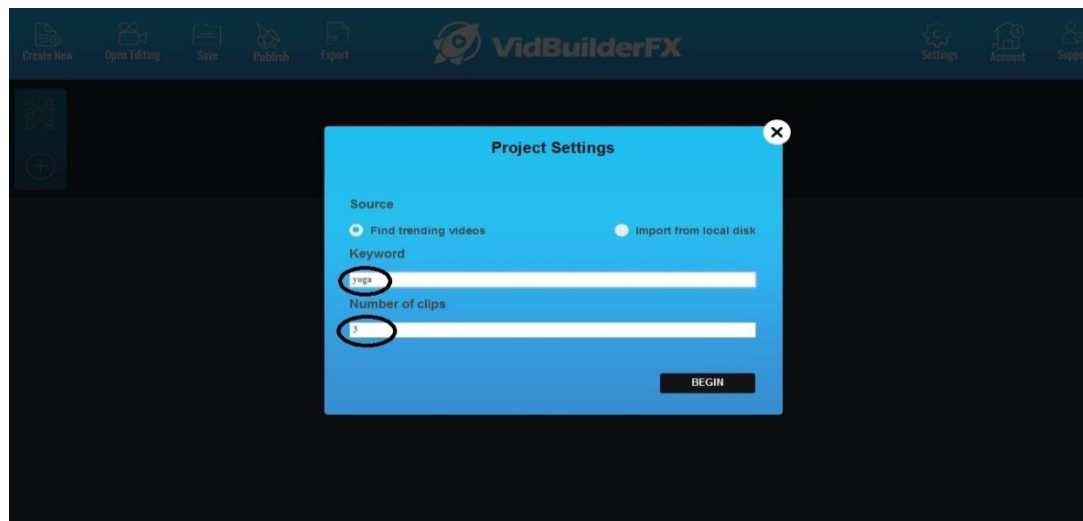

'Single video' option can create a single video in a particular niche and 'multiple video' option will create multiple videos in a single niche.

'Single Video' option:

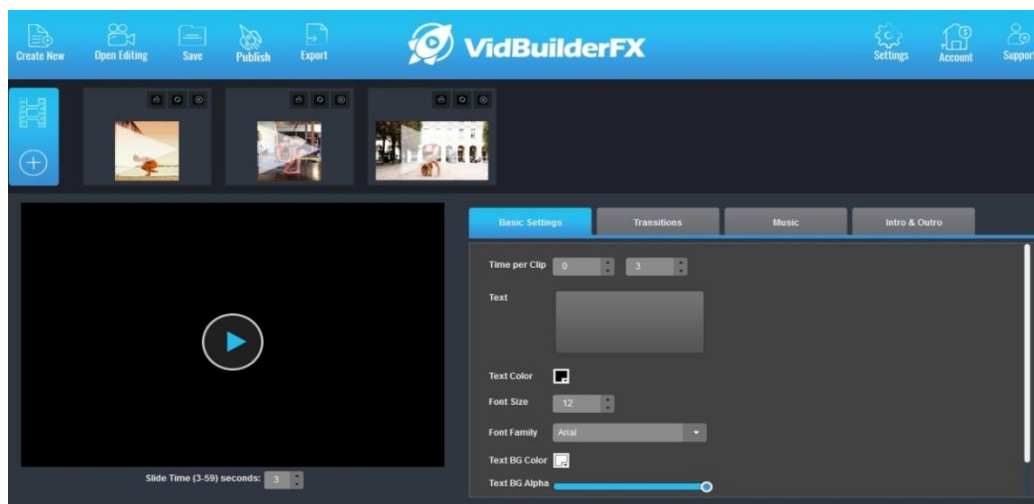

Select the radio button in front of the single video option.

- Press the 'Next' button, and a new dialogue box will appear for Project Settings option. Here you can select for the source of the videos, either select videos from trending videos over internet or simply import it from desktop's local disk.

- Select the radio button of 'trending videos' option.
- Enter a 'Keyword' related to the niche for which you want the video.
- Enter the number of clips to be included in the final video.
- Press the 'Begin' button; the dashboard of VidBuilderFX will open. This is the workspace wherein you'll find all the features and options which you can perform with your videos.

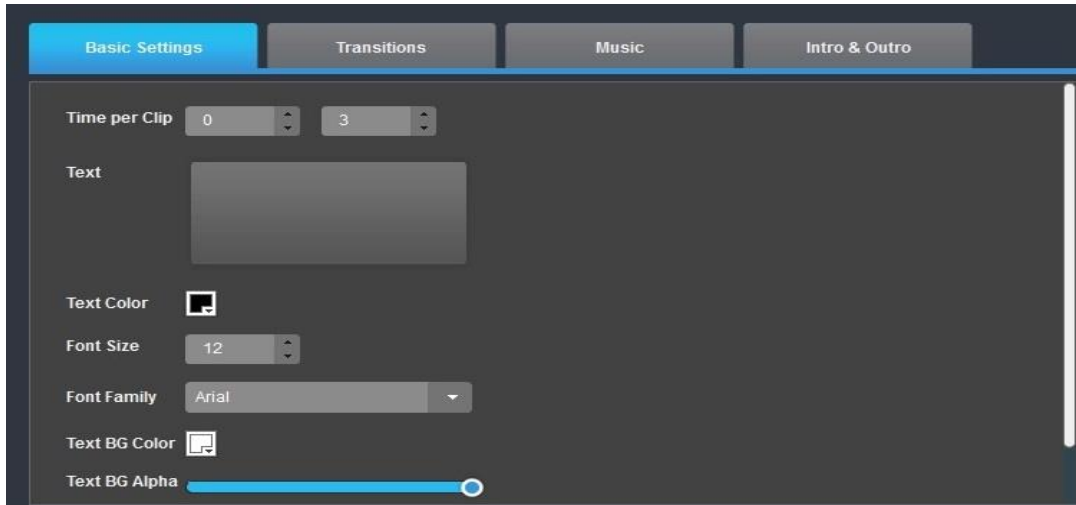

- The main 4 options that would appear are the Basic settings, transitions, music and intro & outro present in the form of tabs.

Basic Settings:

Select minimum and maximum time per clip. You can also select min-max time limits for each clip separately.

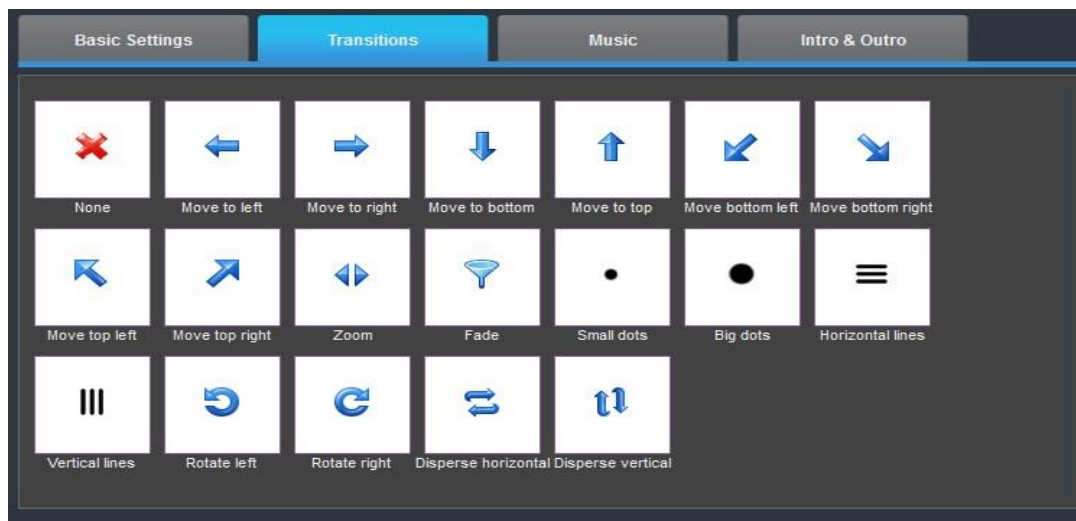

Type the text you want to be displayed inside the video.

You can select text color, font size, font family, text BG color, text BG alpha and also position your text (top, bottom and center).

Transitions:

There are plenty of transition effects available for you to choose from and apply on your video slides.

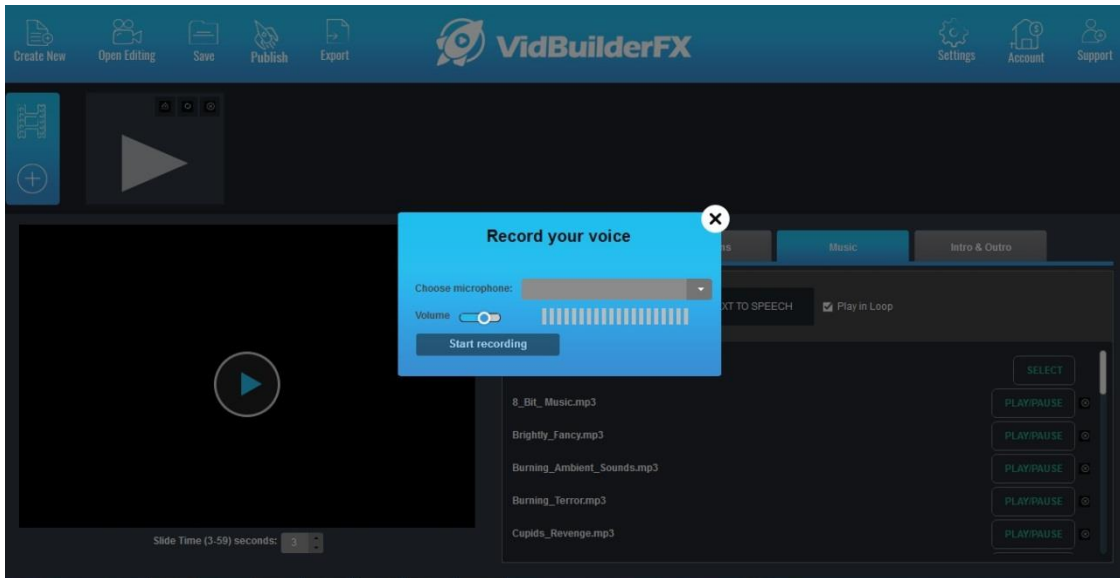

Music:

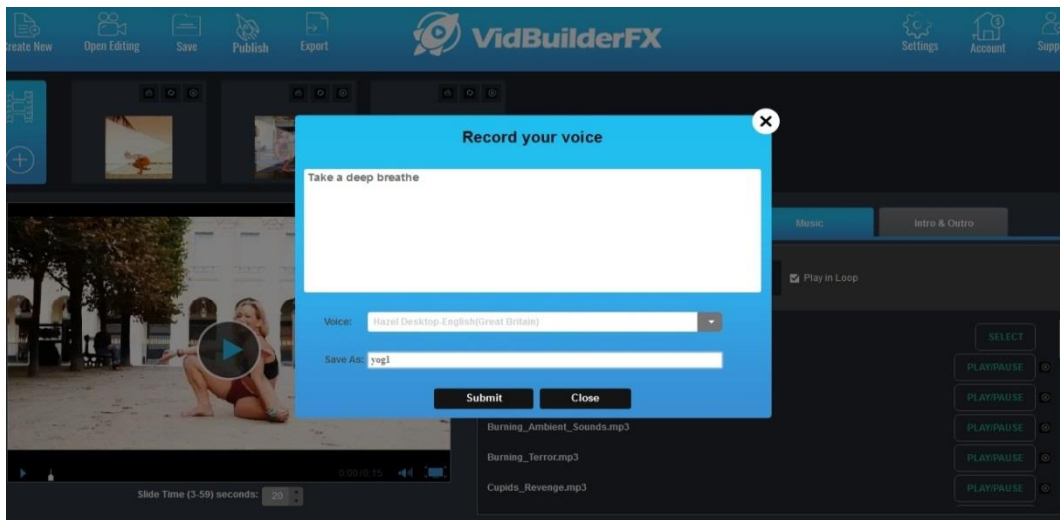

'Music' option allows you to add background music to your video. There are plenty of default musical options available for you to choose from.

An additional option of Text to Speech has also been added through which you can add your custom music or speech. Just write the text which is to be included in the speech and it would automatically get converted into vocal voice.

You can select your own voice by pressing the 'Record' field.

There are three voice options available to you to choose from. Choose a name for saving the text voice-over and making it available for future use.

As soon as you click the submit button, the audio get saved and appears in the list of available music options. Now you can select that particular custom audio as well.

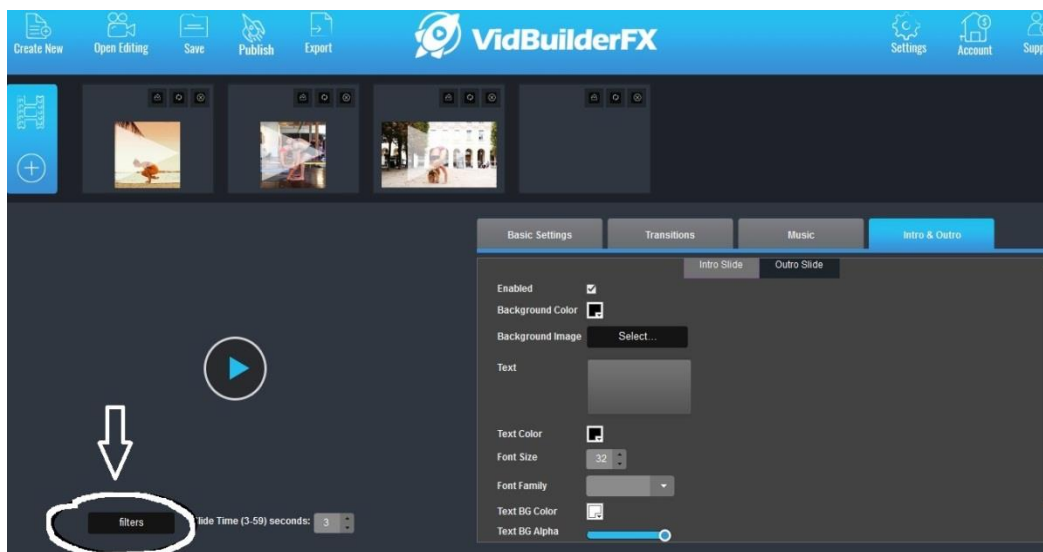

Intro-outrio Slides:

By adding intro-outrio slides you can give credits to the sources from where you have taken these videos or add any additional information which you want to feature in your video.

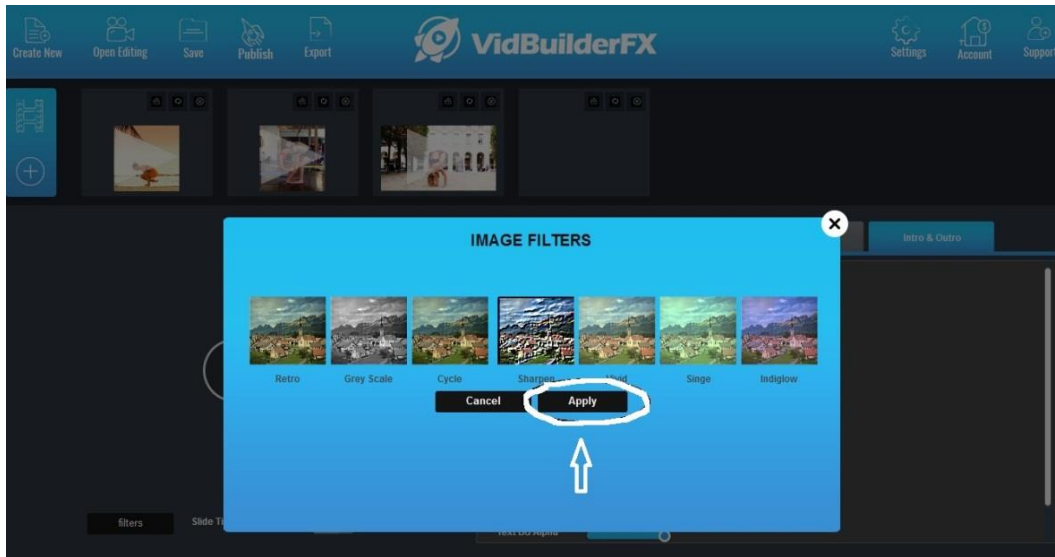

You can add background-color, background image, text color, font size and some others features to your intro-outrio slide, also add some text with your slides.

When you operate on intro-outrio slide, you can see a button 'filters' to select the filters for your slide.

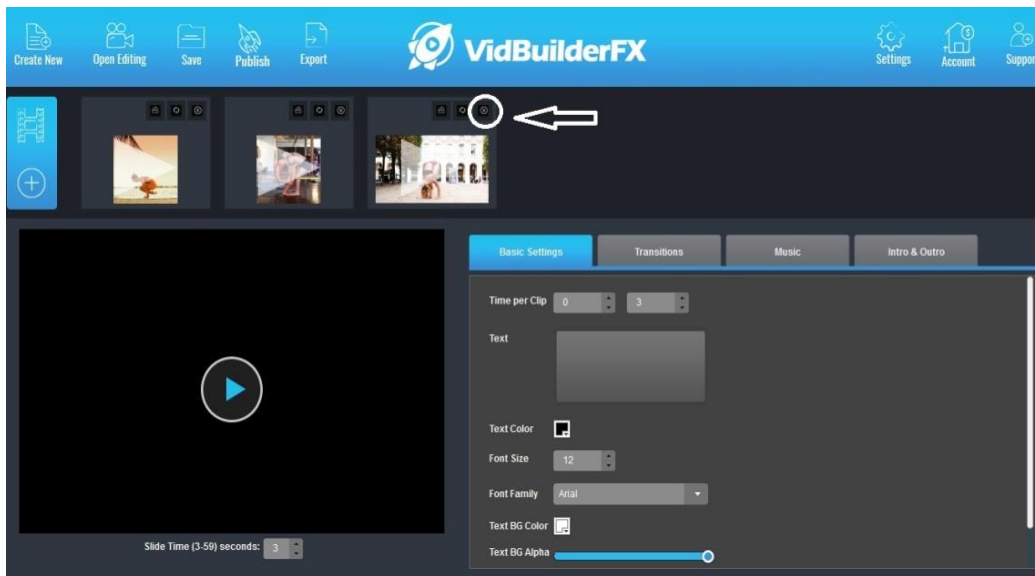

Adding Filters:

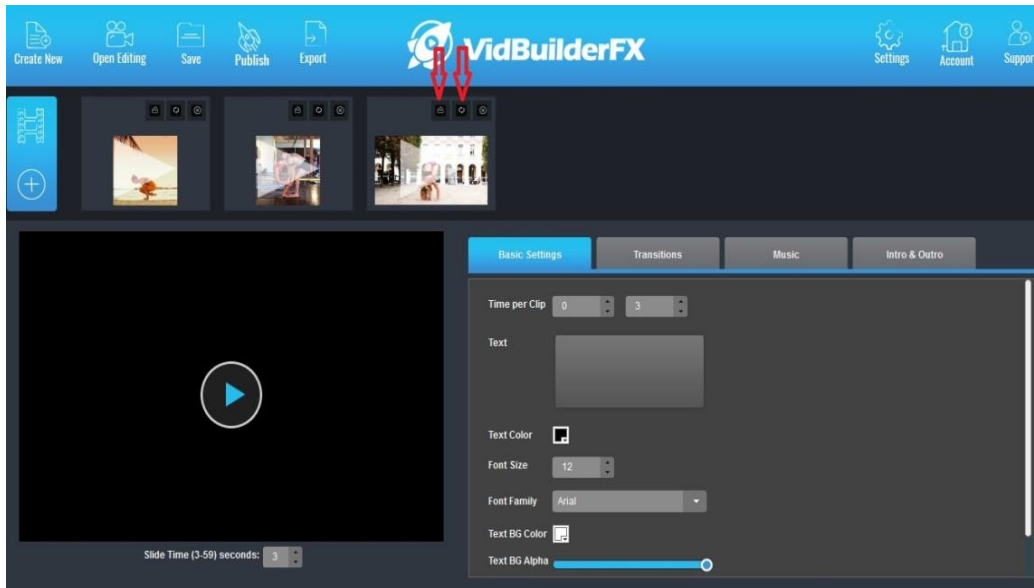

As you click on the 'filters' button, a dialogue box will appear from where you can select any of the transitions for your video slide by pressing on 'Apply' button after selecting the particular transition filter.

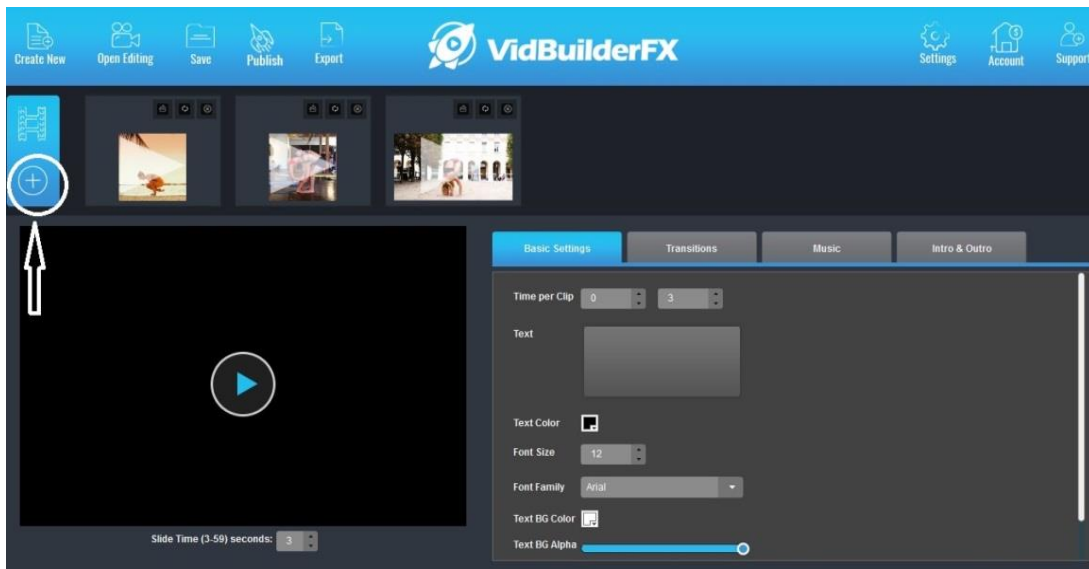

- Further, if you want to remove any of the selected slides, you can remove it by just clicking over the 'x' symbol present on the top-right corner of each slide.

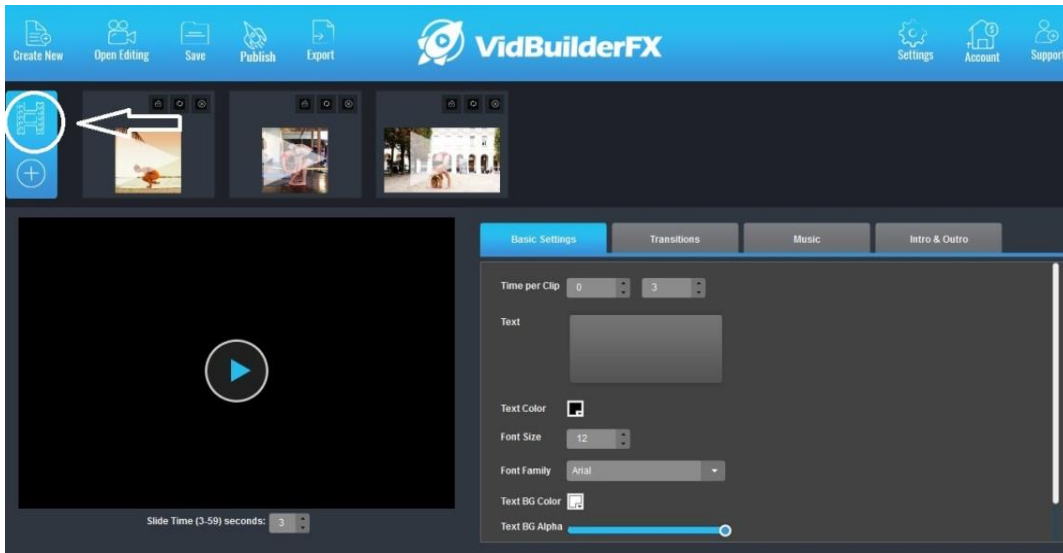

- Also, you can see the URL of the given video and download another related video by clicking on another two options.

- You can add more videos by pressing '+' button provided on the top-left corner of the dashboard.

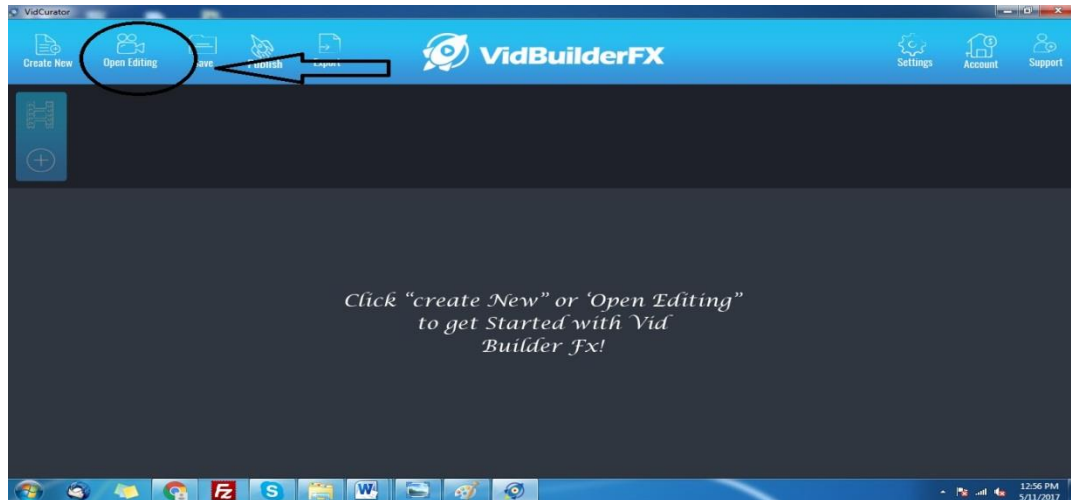

- You can also review the final video that you have created by clicking over the review icon as shown over here.

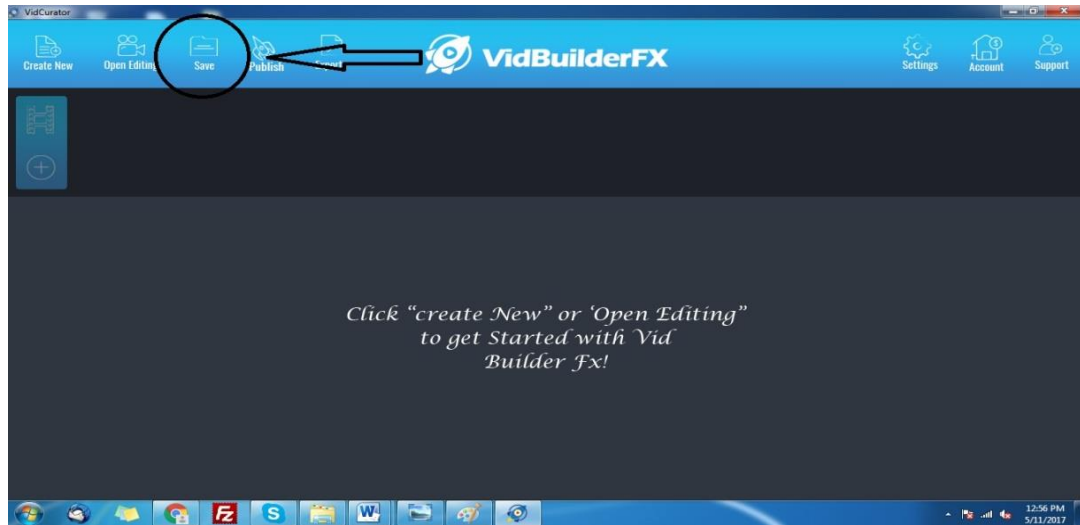

Open Editing:

- With open editing option, you can work on the videos that are already present in your system. Also, you can resume your project on which you were previously working.

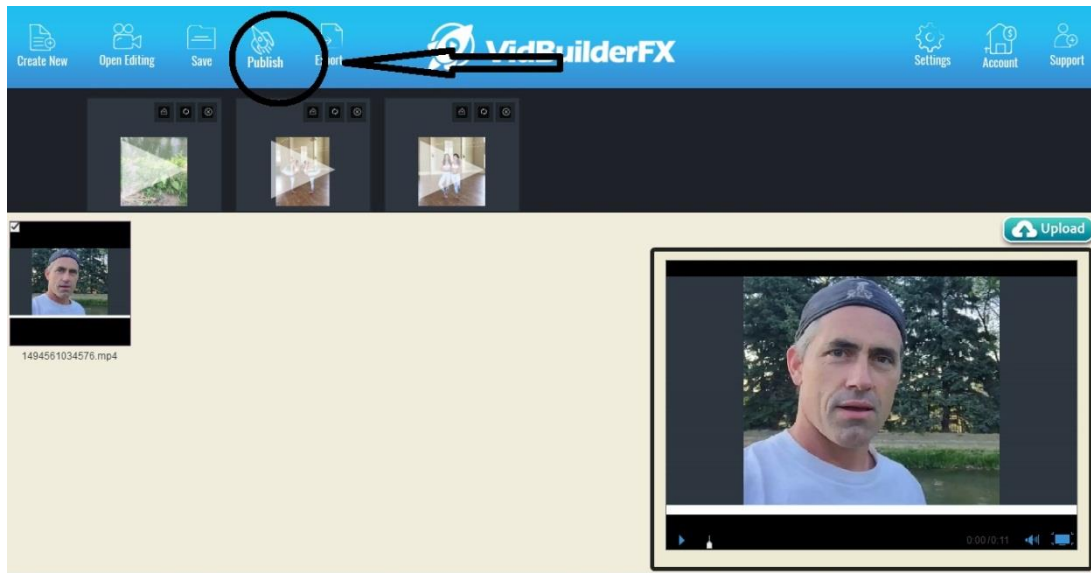

Save:

- By clicking the save icon, you will get an alert box showing 'Project Saved', click 'ok'.

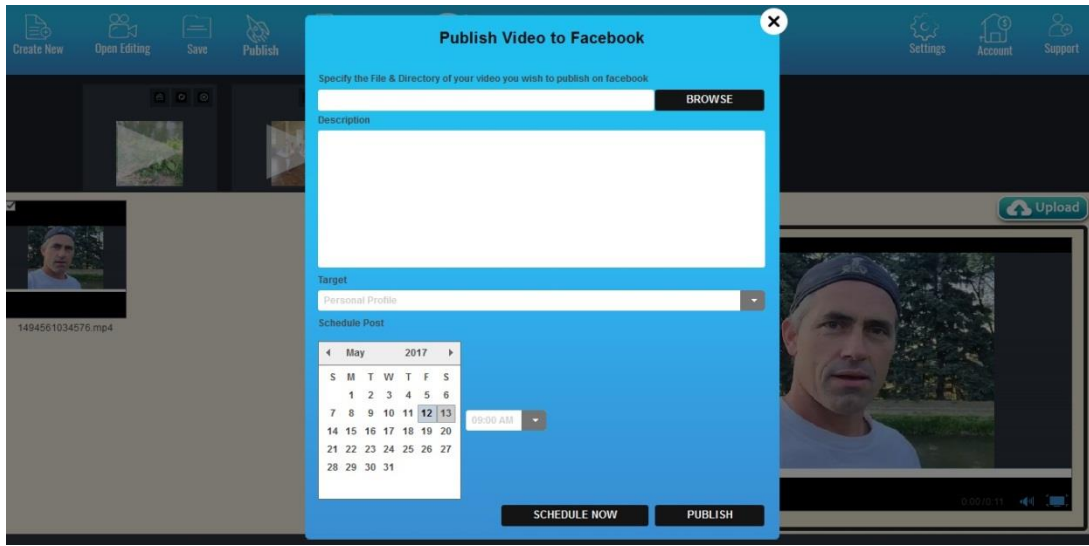

Publish:

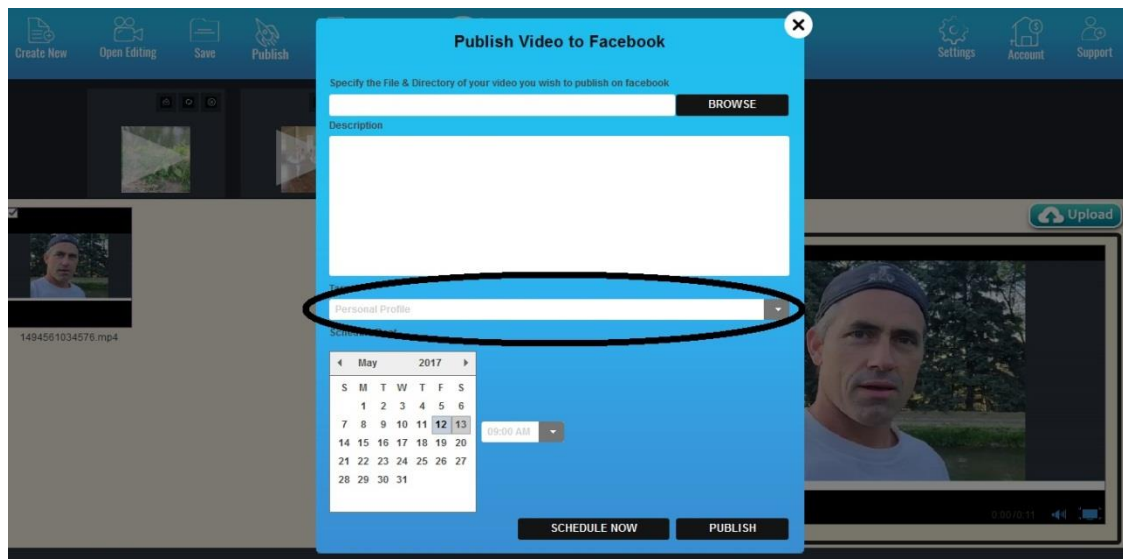

Using this option you can publish your videos to your Facebook profiles, groups or fanpages.

- When you press the publish icon, a dialogue box will appear titled 'Publish Video to Facebook'.

- Enter the path of the video that you saved earlier. Also you can enter the description which would be posted along with your video on your Facebook profile.
- Select the target as to where you want to post this video using the drop-down menu which appears beside the text bar of the 'Target' option.

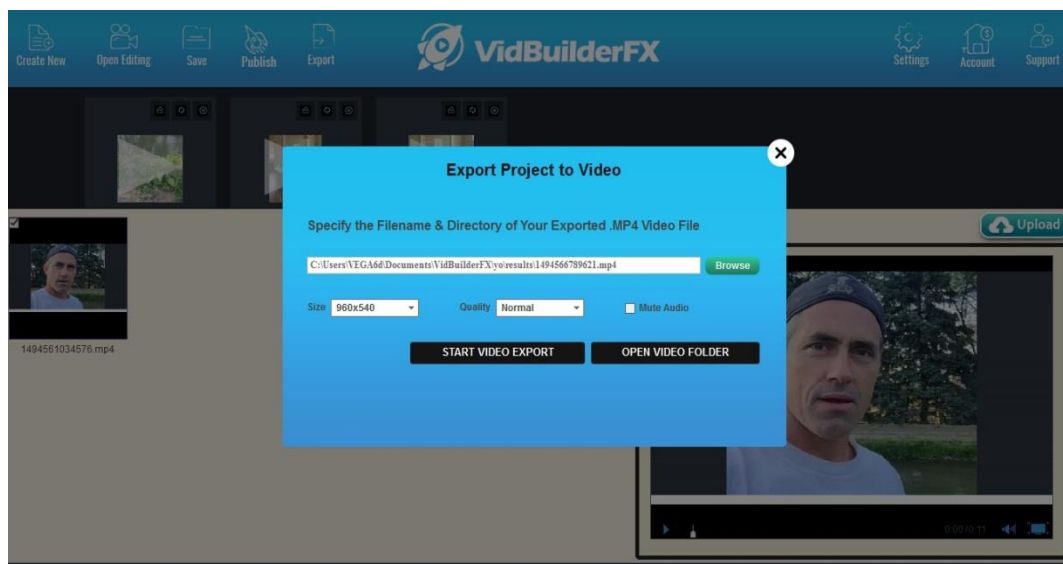

- You can either choose to publish this video instantly by pressing 'Publish' button or you can even choose to publish it later by scheduling it at the desired date and time.

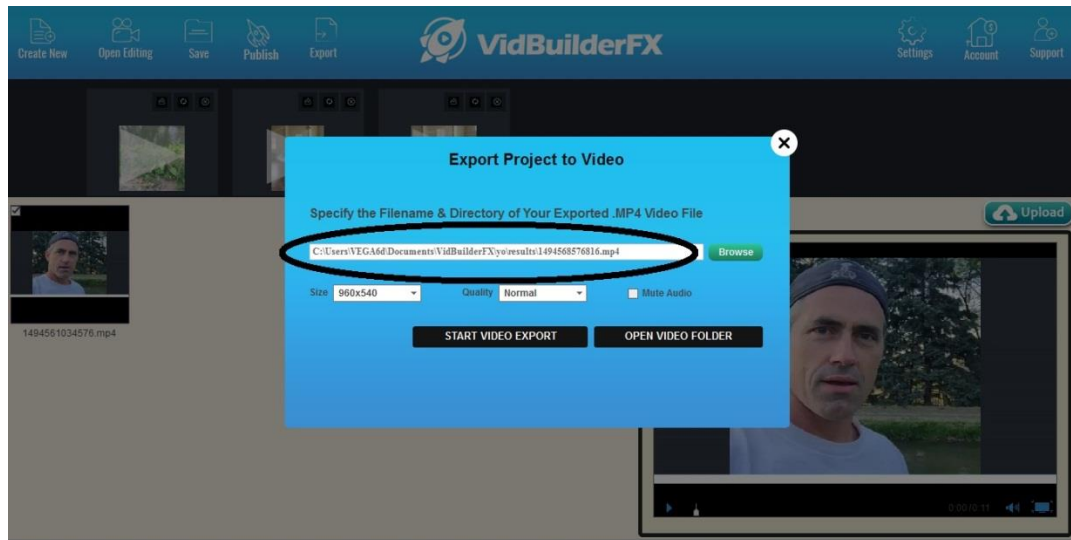

Export:

Using this option, you can export the video to your computer system.

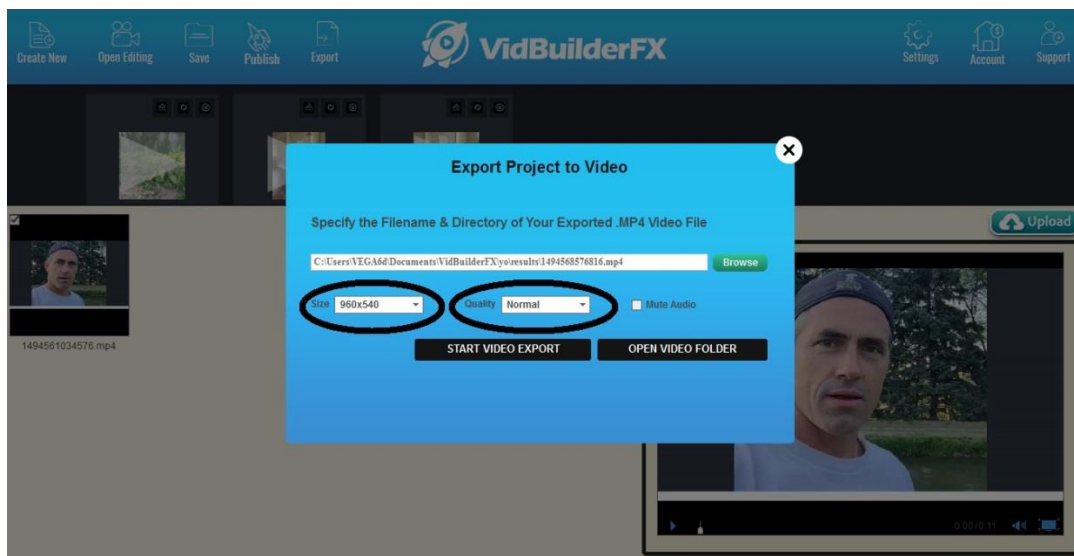

- When you hit the 'Export' icon, a dialogue-box will open named 'Export Project to Video'.

- The path of VidBuilderFX folder will appear by default. But in case you want to change your destination for saving your video then you can click on the 'Browse' button present over there.

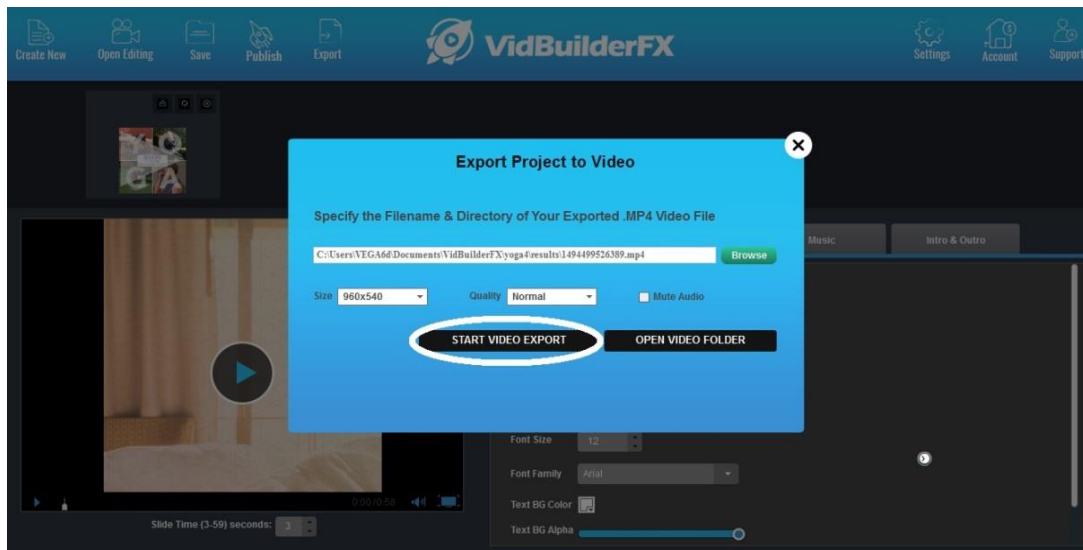

- You can set the resolution of the MP4 file by selecting different sizes from the drop-down menu. Also, you can set the quality of the MP4 file (low, medium or high).

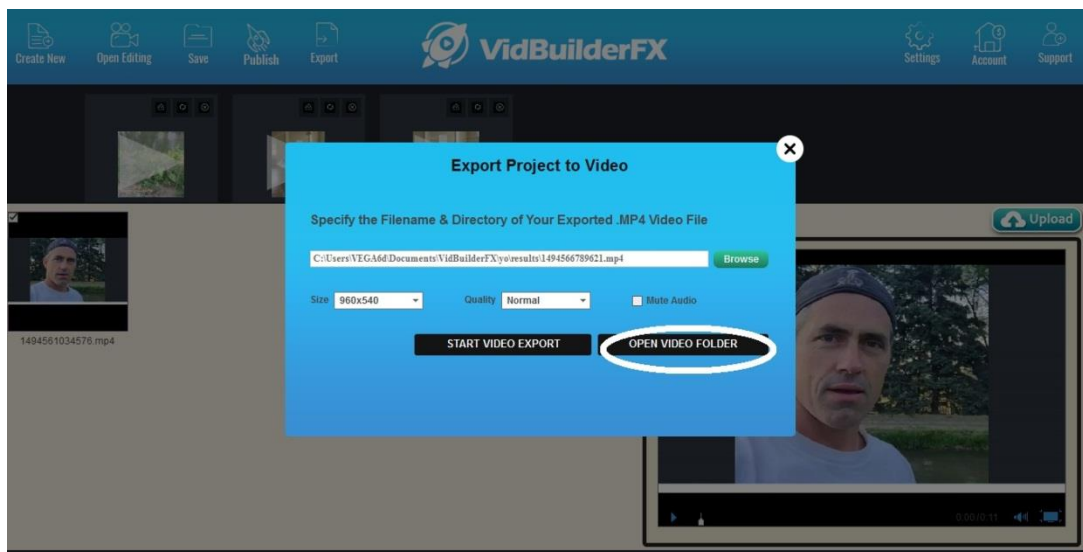

- There is also 'Mute Audio' check-box button to mute the created video.

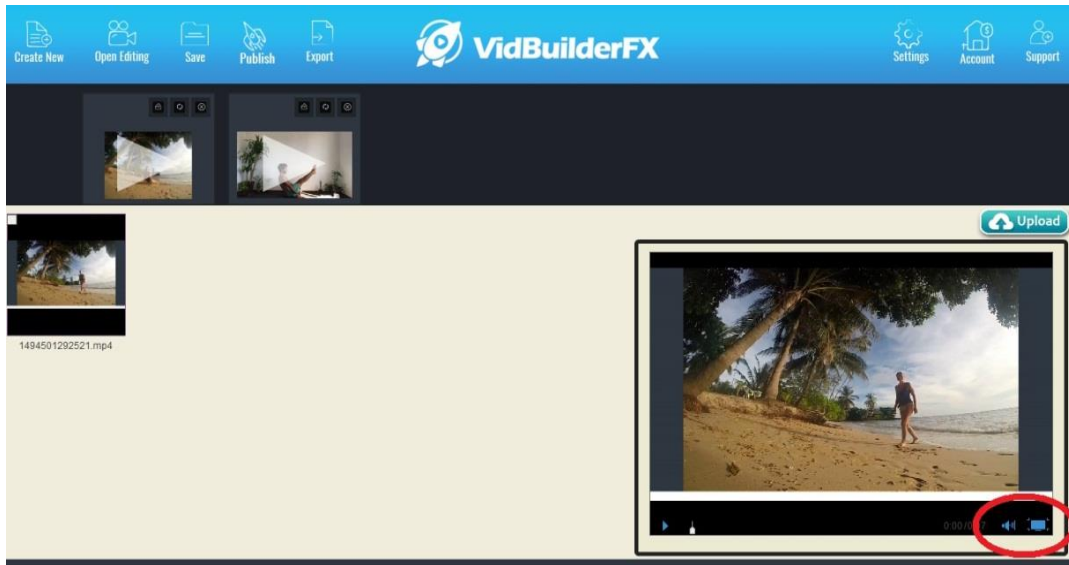

- You can export the video to the destination location by clicking 'Start Video Export' button.

- By pressing 'Open Video Export' button, you can see the destination folder of the exported video.

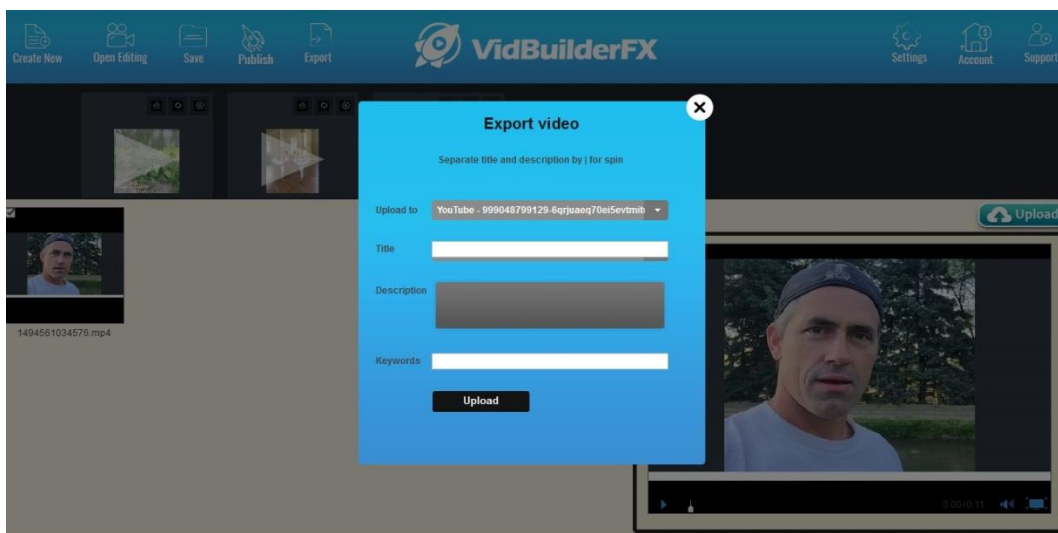

- When your video is successfully exported, it will appear over the dashboard.

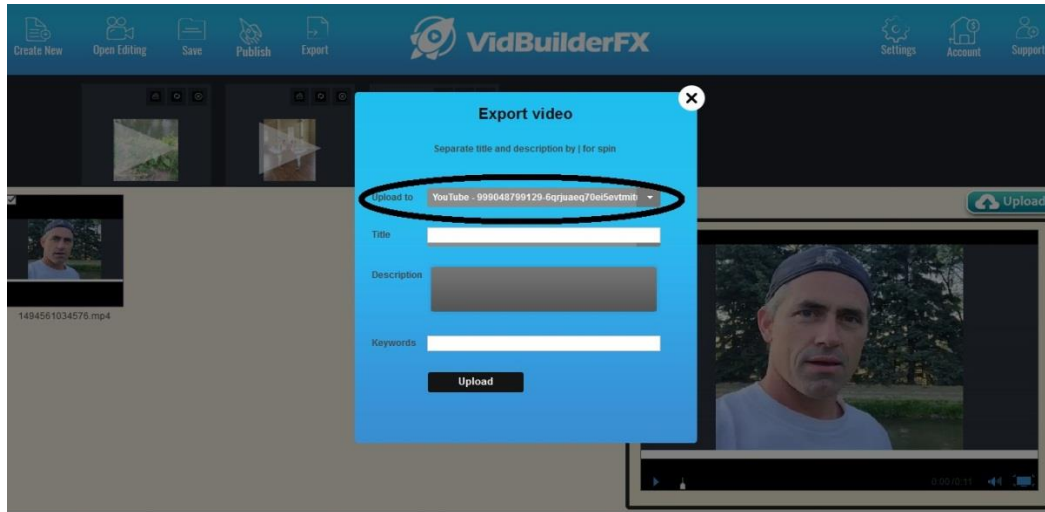

- For previewing your video, click on the available video. Also, there are options to watch the video on full screen and to minimize-maximize the volume.

Video Uploading:

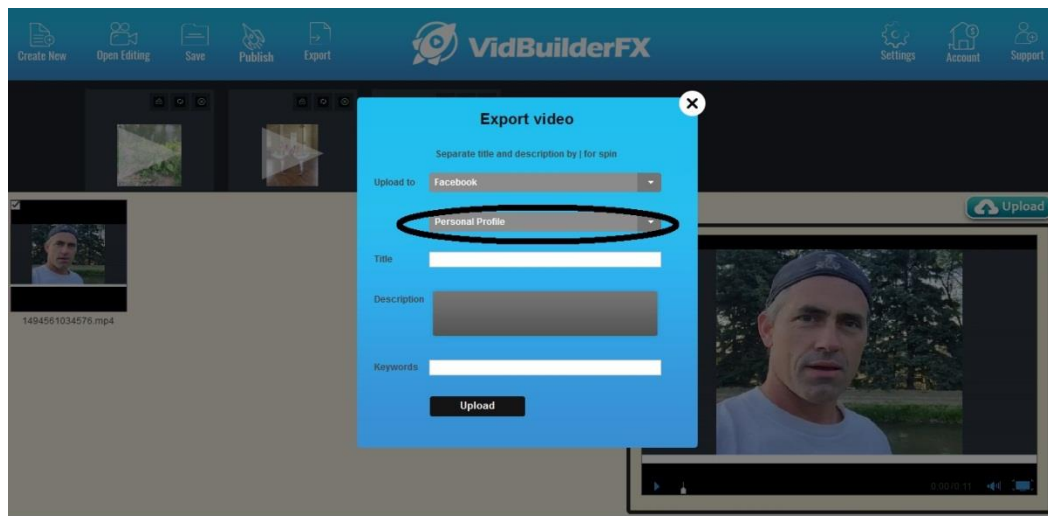

- Select the video and click on the 'Upload' button. As you click, a new dialogue-box will appear, named 'Export Video'.

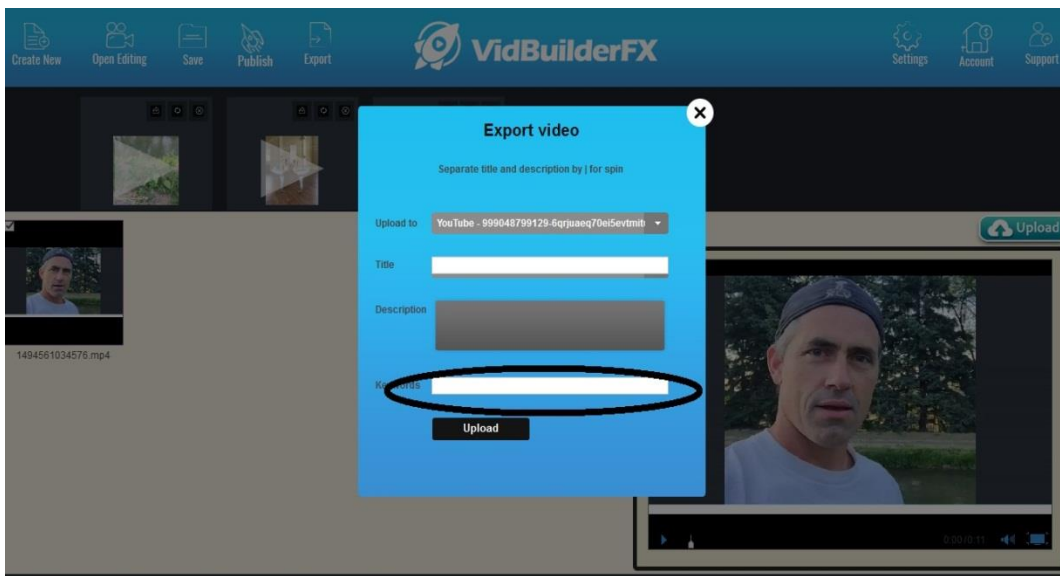

- You can select the destination account (Either YouTube, Dropbox or Facebook) from the drop-down menu of 'Upload to' option to which you want to upload the video.

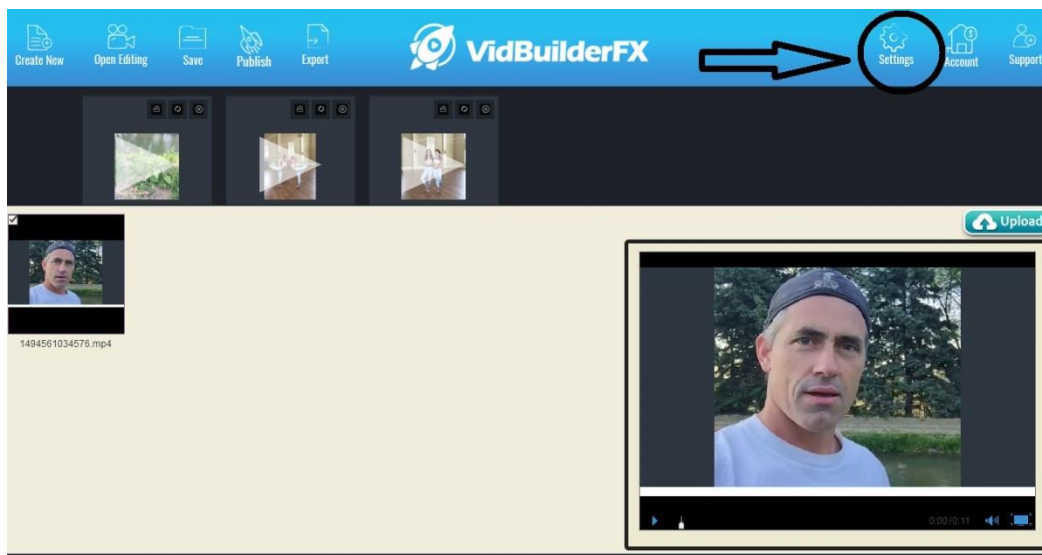

- If you select the Facebook option, you can see another dropdown menu from where you can choose the exact destination where you want your video to be posted to, either on Facebook profile, group or your Facebook fanpage.

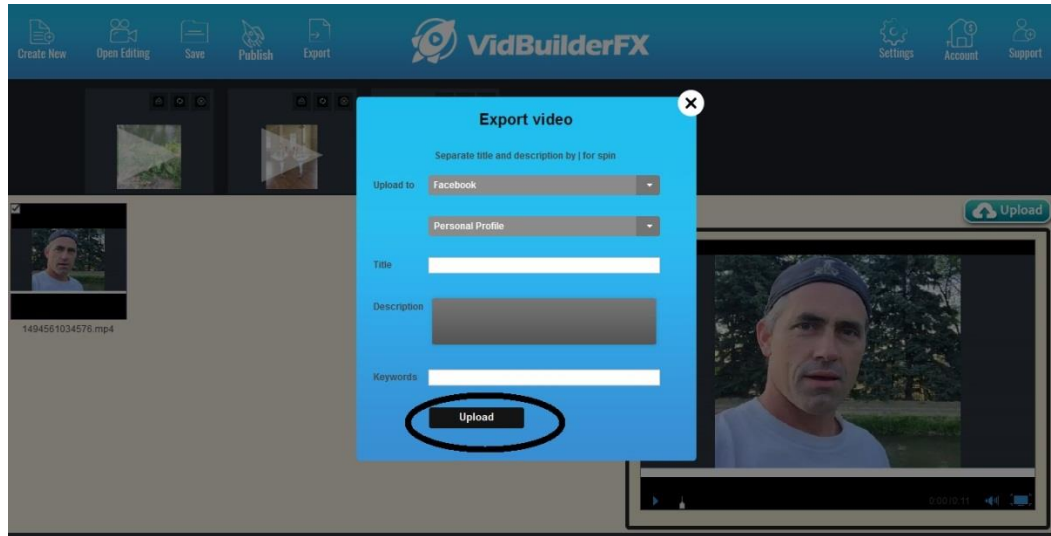

- Enter the title for your video. You can also put some description which would be seen with your uploaded video.
- Enter some keywords, related to your video.

- Also, if your YouTube account is yet not connected, you can connect it from the 'Settings' option present on the dashboard.

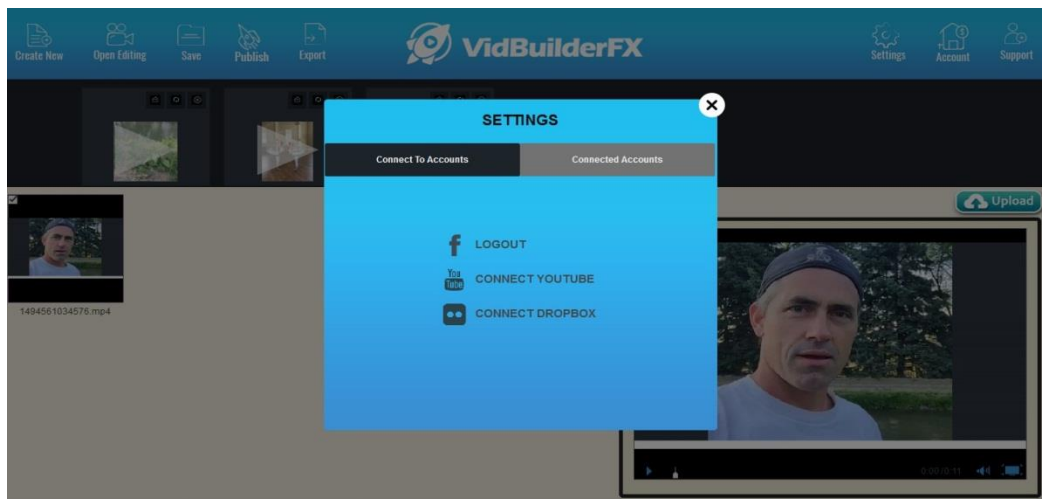

- Now, hit the 'Upload' button to successfully upload the video.

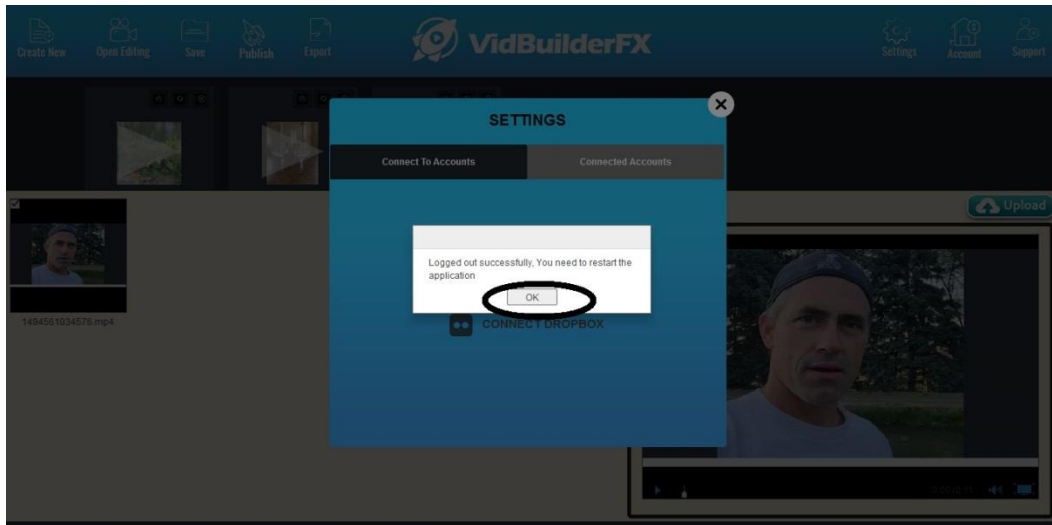

Settings:

- From 'Connect to Accounts' option, you can connect with YouTube with the same procedure of token generating as explained earlier.

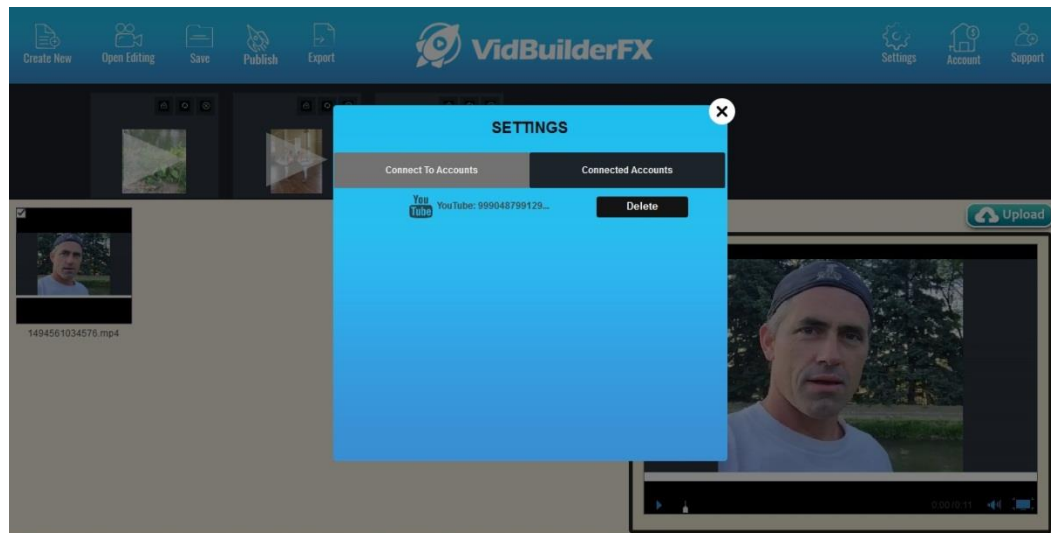

- If you want to login with another Facebook account then you can 'Logout' your current Facebook account by clicking the logout icon. An alert box will appear telling you that you successfully logged out and then you have to restart the application.

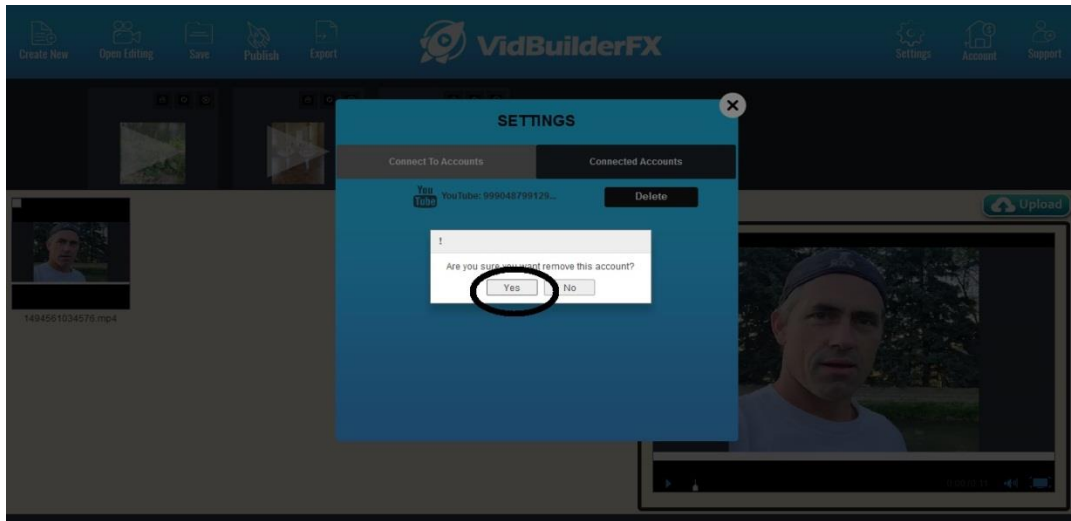

You can connect with as many accounts of YouTube as you want, but only one Facebook account at once.

- In 'Connected Accounts' option, you can see the number of accounts through which you are connected with VidBuilderFx.

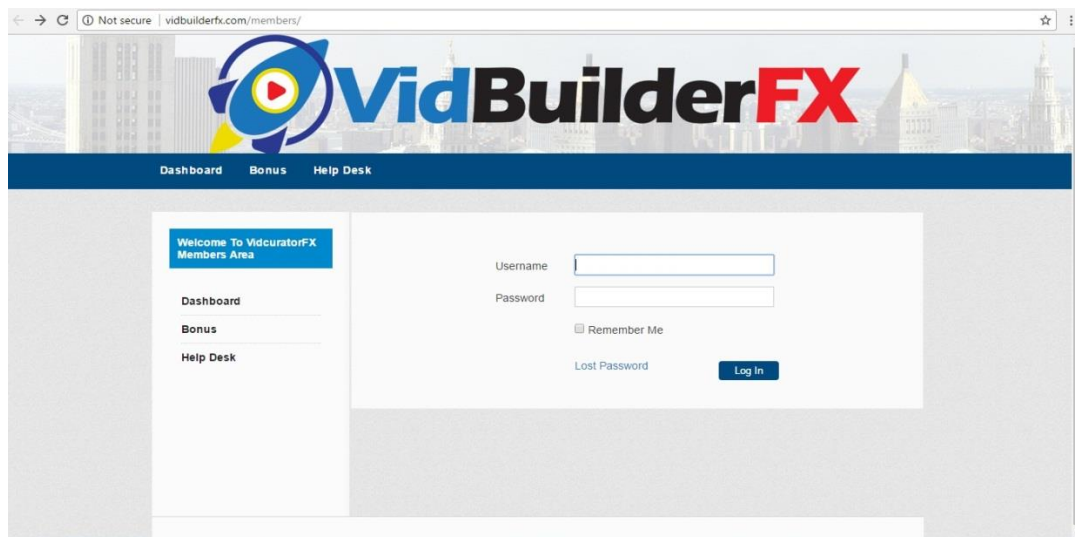

- To delete any of the account, click the 'Delete' button in front of the particular account that you want to delete.

An alert box will appear, asking you for the confirmation of deleting your account. You may proceed by clicking 'Yes'.

Accounts:

- When you click on the 'Accounts' icon, a new window will get open to access the members' area.

On filling the appropriate credentials you will get access to the members' area and also you can get access to the bonus pack for VidBuilderFX.

- You can also reach out for any help regarding bonuses by clicking the 'Help Desk' button.

Support:

- On clicking the 'Support' icon, a new window will appear from where you can reach out the support regarding any help for VidBuilderFX.
