

Testers Qualities

1. Curiosity

- Always curious to know what will be next output.
- Always curious to check the flow.
- As a tester, you should never assume anything.

2. Logical Thinking

- Testing needs smart and outboxes thinking.
- Logical thinking helps in finding out the most unexpected bugs.
- As a tester, you need to focus on nonfunctional requirements also, that is not clearly said.

3. Attentive

- A tester should keep a sharp eye on each and every detail of the product.
- Every small detail is helpful in solving and finding big bugs.

4. Imagination

- Imagine all the possibilities that may occur.
- Consider all the possible scenario.
- Imagine beyond the documentation and test script.

5. Communication skills

- As a tester, you need to interact with your team to gather information related to the product.
- A person with good communication skills can interact with and understand the product requirements.
- A tester needs to form information from data collected from different team members.

6. Test for quality over quantity

- Focus on finding sensible bugs.
- Finding quality bugs is more important than Finding a large number of useless bugs
- Identifying the most important bugs and glitches, and helping the company or developer make sense of the bugs is ten times more helpful then testing for mere volume.

7. Learn to prioritize

- Focus on Finding higher priority bugs that may severely affect the system.
- Prioritizing gives a clear view of which bugs are to be fixed first.

8. Learn from your own mistakes – and from others too

- Learning from mistakes is the best way to improve your skills.
- Learning from others mistake save your time.

- Continuous learning makes the testing task easier.

9. Question Everything

- Do not trust anybody or anything.
- Always Ask why? How? and what? For everything when you test software.

10. Think like the user

- To understand user expectations think like a user.
- When you test as a user you have to keep in mind how technical your users are.

11. Be Passionate

- To excel in any field, you need to be passionate about what you do.
- Read, seek new training opportunities, engage with your fellow testers, attend the testing conference, classes.
- Keep on updating your skills.
