Multidimensional Poverty Index

**Global MPI in India: 2016 v 2006**

- A household is deprived in the poverty line but still deprived of needs such as education, health, and assets.
- The MPI measures poverty and the degree to which they are deprived.
- The Global Multidimensional Poverty Index (MPI) was developed by OPHI with the UNDP.
- The purpose of the MPI is to build a more realistic, systematic methodological and economic framework for reducing multidimensional poverty.
- The Global Multidimensional Poverty Index (MPI) was released by the United Nations Development Programme (UNDP) and the Oxford Poverty and Human Development Initiative (OPHI).
- The MPI value ranges from 0 (no poverty) to 1 (maximum poverty).
- The MPI reflects both the share of people in poverty and the degree to which they are deprived.
- The MPI measures multiple deprivations in the same community.
- The MPI value is the average intensity of poverty, which reflects both the share of people in poverty and the degree to which they are deprived.
- The MPI is an international measure of acute poverty.
- The MPI is a direct cross-country comparability indicator.
- The MPI captures the experience deprivations in school attendance.
- Insufficient access to clean water and poor nutrition contribute to poverty.
- Insufficient access to clean water, electricity, housing, and assets also contributes to multidimensional poverty.
- Insufficient access to clean water and poor nutrition contribute to poverty.
- The Oxford Poverty and Human Development Initiative (OPHI) is the main academic and technical advisor to the MPI.
- The MPI is a direct focus on the culture.
- The MPI is a direct cross-country comparability indicator.
- The MPI is a direct cross-country comparability indicator.
- The MPI is a direct cross-country comparability indicator.
- The MPI is a direct cross-country comparability indicator.
- The MPI is a direct cross-country comparability indicator.
- The MPI is a direct cross-country comparability indicator.
- The MPI is a direct cross-country comparability indicator.
- The MPI is a direct cross-country comparability indicator.
- The MPI is a direct cross-country comparability indicator.
- The MPI is a direct cross-country comparability indicator.
