Cabinet has recently approved 60% death in India for NCDs since the last National Health Policy (NHP) in 2002.

Health Policy (NHP) 2017

- **Provisions:**
  - Other Issues
    - Shifts Seen In New Policy Shifts Seen In New Policy
    - For all by ensuring following Healthcare Provisions:
      - Other Issues
        - Public-Private mix for health care
          - Private sector role for health care
            - Public and Private sector partnership
    - Other Issues
      - Policy mix
        - Shift From Sick-Care To Wellness
    - Related
      - Increased spending on health by 3/5th of GDP
      - Tackling catastrophic health expenditures
    - Nationally
      - Reduce disease burden of India in current and emerging challenges in socio-economic changes and health policies.
      - Health Care and commitment for effective implementation.
      - NDPS 2017 seeks to invest in more trained doctors and nurses and does not confront the pervasiveness of fake doctors constituting ‘half’ of the doctors here (WHO report).

**Related Issues**

- Health and related issues
  - Impact of health and related issues
    - Low public health spending (1.15% of GDP)
    - Current budgets also not reflecting public health spending towards health by 3/5th of GDP
    - Impact of health and related issues
