ZW-5 series Parallel linkage tool carrier version

ZW180PL

WHEEL LOADER

Model Code : ZW180PL-5B
Engine Power : 129 kW (173 HP)
Operating Weight : 15 470 - 15 670 kg (34 110 - 34 550 lb.)
Bucket ISO Heaped : 2.5 - 3.0 m³ (3.3 - 3.9 yd³)
The Hitachi ZW180PL-5 wheel loader has been designed with one aim in mind: empowering your vision. In terms of productivity, comfort, advanced technology, environmental performance and maintenance, it delivers on all levels. It not only meets our customers’ expectations of high-quality, reliable machines, but also provides operators with a safer working environment, a comfortable cab with easy-to-use controls, and overall, a machine that responds quickly and precisely.

To ensure optimum availability of the ZW180PL-5, we have incorporated easy maintenance features into its design. We also offer the flexible Hitachi Support Chain after-sales program to customers who wish to further enhance its uptime and protect their investment.

**CONTENTS**

4-5 Comfort
A comfortable work space enhances operational efficiency.

6-7 Advanced technology
Hitachi is renowned for manufacturing technologically advanced machines that deliver an outstanding level of performance.

8-9 Environmental awareness
The ZW180PL-5 has a positive effect on levels of safety and sustainability.

10-11 Productivity
New hydraulics and gearshift systems, plus enhanced maneuverability, ensure maximum productivity.

12-13 Maintenance
Daily inspections can be carried out quickly and easily, which increases the availability of the ZW180PL-5.

14-15 Hitachi Support Chain
Customers can choose from a comprehensive range of after-sales services.

16-19 Specifications

**WALK AROUND**

**Advanced technology**
Comfortable and fuel efficient traveling performance with the New HST control system.

**Parallel Lift Arm**
Provides parallel movement from ground level. Perfect for loading and unloading items with increased load control.

**Lower fuel costs**
The ZWPL-5 wheel loaders can work in two modes, which provide an appropriate level of performance for a particular job. One is for regular operations with the benefit of efficient fuel consumption; the other is for more demanding tasks and increases productivity. The auto-engine shutdown function avoids fuel wastage while the machine is waiting for a dump truck.

**High productivity**
A new hydraulic circuit facilitates the combined operation of the bucket and lift arm for loading and prioritizes use of the bucket for unloading.

**Powerful engine**
The 6.7 liter (408.9 in³) six-cylinder water-cooled turbo engine enables a powerful digging performance, impressive travel speeds and benefits from excellent fuel consumption.

**Heavy-duty axle**
Hitachi axles are renowned for high performance and durability – ideal for working on demanding job sites.

**Hydraulic Quick Coupler**
Switch attachments from the comfort of your cab. Enables the rapid and seamless replacement of working tools.

**Spacious cab**
The air suspension seat can slide further back, providing more legroom. The tilting telescopic pop-up steering column has also been repositioned to create additional space.

**Ultimate comfort**
An air-conditioning system regulates the temperature inside the cab and a filter is available for industrial waste job sites. Sound insulation reduces noise levels.

**Operator safety**
A pillar-less windshield and large sun visor have enhanced visibility levels from the operator’s seat.

**Controlled movement**
A new clutch cut-off system allows for smooth operation when the ZWPL-5 wheel loader is loading.

**Transmission control**
The automatic transmission selects the appropriate gear for travelling and digging.

**Counterweight**
Provides better stability during the transfer of heavy loads.

**Quick and easy service access**
The engine cover provides easy access to inspection points and allows for quick maintenance at ground level.

**Parallel Lift Arm**
Provides parallel movement from ground level. Perfect for loading and unloading items with increased load control.

**High productivity**
A new hydraulic circuit facilitates the combined operation of the bucket and lift arm for loading and prioritizes use of the bucket for unloading.

**Powerful engine**
The 6.7 liter (408.9 in³) six-cylinder water-cooled turbo engine enables a powerful digging performance, impressive travel speeds and benefits from excellent fuel consumption.

**Heavy-duty axle**
Hitachi axles are renowned for high performance and durability – ideal for working on demanding job sites.

**Hydraulic Quick Coupler**
Switch attachments from the comfort of your cab. Enables the rapid and seamless replacement of working tools.

For operator comfort, the ZWPL-5 series is second to none

Key features
- Air-suspension seat
- Expansive leg room
- Ergonomically designed control panel
- Effective air conditioning
- Tilting telescopic and pop-up steering column
- Easy access via sloped ladder and wide steps
- AUX input for MP3 player

COMFORT

The spacious cab of the ZW180PL-5 wheel loader was designed to offer maximum comfort. Several modifications have been made to create more room, provide greater visibility and offer a pleasant working environment for operators. Practical and user-friendly features have been incorporated to help you work quickly and easily. The ultimate aim was to improve the overall user experience of Hitachi ZWPL-5 wheel loaders, so you could enjoy your work and feel less fatigued at the end of the day.

Take a seat
Hitachi has prioritised operator comfort in the design of the ZWPL-5 wheel loaders to give you a greater sense of enjoyment during your working day.

The sloped ladder and wide steps allow quick and easy access to the cab. The air-suspension seat with adjustable lumbar support can slide back further than ever before, allowing more leg room. The wrist and arm rests and right-hand side console can be adjusted to achieve a comfortable sitting position, and the tilting telescopic and pop-up steering column has also been repositioned to create additional space.

Pleasant working conditions
Busy construction sites and quarries can be stressful environments to work in, but Hitachi has installed a range of features in the ZWPL-5 wheel loaders to make you feel more relaxed wherever you are.

An effective air conditioning system regulates the temperature within the cab. An air-conditioning filter can also be fitted for working in industrial waste and indoor disposal facilities. Noise levels within the cab have been reduced thanks to a high level of sound insulation.

Space for storage
Working long shifts means that you can spend most of your day in the cab of the ZWPL-5 wheel loader. Hitachi has incorporated several practical features to make you feel more at home.

There is a large space for a lunch box to be placed behind or at the side of the seat. The cab also has a large cool box, which is cooled by the air conditioner, with enough storage space for four cans or bottles. The cab also has a drinks holder, designed to hold a tumbler.

Enjoy your day
A happy operator is also a more productive one. That’s why we have enhanced the versatility of the audio equipment, so you can listen to your favourite music while you work.

The AM/FM/WB stereo radio now has an auto-tuning feature and the two-speaker stereo system provides excellent sound quality. It is also possible to connect this with your personal MP3 player.
ADVANCED TECHNOLOGY

Several decades of experience in manufacturing construction equipment have placed Hitachi at the forefront of the industry. Its technologically advanced machines are renowned around the world. The ZW180PL-5 has been developed using this expertise and has the capability of exceeding previous levels of performance and productivity. In addition, many of the features on the ZWPL-5 wheel loader range will result in lower fuel consumption and a reduced impact on the environment.

A superior performance is guaranteed

Simple work mode

The ZWPL-5 wheel loader can operate in two modes to ensure lower fuel consumption and maximise productivity: Standard mode is for regular duties such as loading materials; and P mode is chosen for more demanding tasks such as heavy duty digging.

In Standard mode, the engine speed is controlled, which allows for smooth and efficient acceleration during loading, regular operations and travelling on level terrain. Fuel consumption is reduced by up to 10%, enhancing its environmentally friendly performance.

The P mode is useful when greater traction force is required for heavy-duty excavation and travelling uphill. By fully utilising the engine’s capability, it allows for powerful digging and a quick ascent up gradual slopes.

Quick power switch

The operator can boost the power of the ZWPL-5 wheel loader at the push of a button. The Quick power switch changes the mode from Standard to P and can be used when the machine is travelling uphill with a full load or when greater breakout force is required.

Clutch cut-off

The clutch cut-off system controls clutch timing for smoother operation, according to travel speed and the amount of stroke of the brake pedal. When travelling at high speed on flat terrain, the clutch can be released early so the wheel loader slows down smoothly with the application of the brake pedal.

When travelling slowly uphill, the clutch is released by deeply depressing the pedal to allow for easy unloading.

Key features

- Simple work mode
- Quick power switch
- Clutch cut-off
ENVIRONMENTAL AWARENESS

The environment was an important design consideration for the range of ZWPL-5 wheel loaders. The ZW180PL-5 has been developed to have a positive impact on both safety and sustainability. It satisfies the latest U.S. EPA Tier 4 Interim emission standards and has a variety of fuel-efficient features, which help to reduce running costs. With greater all-round visibility from the cab, the ZW180PL-5 also contributes to enhanced safety and the successful operation of any job site.

Key features

- Fuel-saving work mode
- Auto-engine shutdown
- Diesel Oxidation Catalyst (DOC)
- ECO display
- Pillar-less windshield
- Large sun visor
- Both sides of counterweight visible
- Rear-view monitor
- Shift-up delay to third gear

The ZW180PL-5 contributes to a cleaner, safer environment

A cleaner environment

The ZWPL-5 wheel loader range epitomises our efforts to minimise the impact of construction machinery on the environment in compliance with U.S. EPA Tier 4 Interim. The variable geometry turbocharger – that encourages optimal combustion – and cooled EGR (Exhaust Gas Recirculation) helps to reduce nitrous oxide levels.

The maintenance-free Diesel Oxidation Catalyst (D.O.C.) reduces particulate matter (PM) from engine exhaust by simple, flow-through passive oxidation without the need of SCR or EGR (Exhaust Gas Recirculation Filter). A chemical reaction occurs at normal system temperatures that allow a reduction of PM in the exhaust without compromising performance or reliability.

The auto-engine shutdown function prevents fuel wastage by stopping the engine while the wheel loader is long idling. In addition, all resin parts on the ZWPL-5 are suitable for recycling and clearly marked for ease of use in this process. The ECO display visualises ECO drive and results in a fuel-saving performance.

A safer environment

The operator of the ZWPL-5 can relax with the knowledge that he is working in a safer environment. The wheel loader offers excellent visibility from all angles. The view from the cab is enhanced by a pillar-less windshield, a large sun visor and additional glass panels in the door.

Looking to the rear of the machine, the counterweight is now visible on both sides, which is particularly useful for working on small job sites. The rear-view monitor allows the operator to see right behind the machine. The color display is easy to view and works automatically when the FNR lever/switch is reverse position.

Shift-up delay to third gear

This system delays the timing of the shift-up to the 3rd gear to enhance safer operation of the ZWPL-5 wheel loader in confined spaces. The wheel loader can perform excavating and unloading tasks more safely in first and second gear.
The Hitachi ZW180PL-5 wheel loader has been built to exceed your expectations. The design incorporates a hydraulic circuit and a smooth lift arm movement, which help to boost efficiency on the job site. Productivity has also been increased by the wheel loader’s enhanced maneuverability, due to the automatic gearshift controls. With the ZW180PL-5 range, you can look forward to a quick return on your investment and greater profitability.

**Key features**
- Powerful and sustainable
- Ride control
- Automatic gearshift
- New hydraulics circuit
- 5 gear transmission
- Environmentally friendly design
- Smooth lowering of lift arm
- Adjustable kick-out height and auto leveler

**Increased efficiency**

We have designed the ZW180PL-5 to offer increased productivity – without burdening the environment – through sustainable operations. It is equipped with a new hydraulic circuit, which facilitates the combined operation of the bucket and lift arm for loading, and prioritises use of the bucket for unloading.

The lift arm movement also makes a contribution to the ZWPL-5’s high-productivity levels. The lowering of the lift arm stops smoothly thanks to the restriction valve, reducing vibrations and results in less operator fatigue.

The height of the lift arm kick-out and lift arm auto leveller are easily adjusted using the buttons in the side console.

**Enhanced maneuverability**

The maneuverability of the ZW180PL-5 has been enhanced by automatic gearshift controls.

The Auto 1 option automatically shifts between first and fifth gears, depending on the load, when second to fifth gears have been engaged.

The Auto 2 option automatically shifts between second and fifth gears, relative to the load. The operator can also change gear manually using the Down SHFT Switch, if required, to suit the terrain on any job site.

The ZW180PL-5 series is equipped with a ride control feature that reduces vibration while the wheel loader is travelling on rough ground or snow. In auto mode, it turns on and off automatically while the wheel loader is in operation.
Wherever you operate the ZW180PL-5 wheel loader, high levels of availability are guaranteed. This is thanks to a number of features that allow quick and easy routine maintenance procedures. Daily checks can be made at ground level, for example, because the engine and radiator cover can be opened fully, providing convenient access. The ZW180PL-5 has been designed to make life easier on the job site, allowing you to work productively and keep downtime to an absolute minimum.

Key features

- Daily checks from ground level
- Automatic reversible cooling fan
- Quick and easy service access

Work for longer with the ZWPL-5 wheel loader

Easy access

Hitachi has introduced a range of time-saving features on the ZWPL-5 wheel loaders, which are designed to make life easier for you on the job site. Many of the covers on the machine can be opened fully so you can access maintenance points quickly and easily on a daily basis. Many features – such as the greasing points, oil levels and the fuel filters – can be accessed at ground level. Using the front console you can set the routine service schedule to help prevent breakdowns each time the ignition switch is turned on.

Easy cleaning

Quick and easy routine maintenance is essential for you to achieve high levels of productivity on the job site. The Hitachi ZWPL-5 wheel loaders are capable of working for longer thanks to convenient features, such as the automatic reversible cooling fan. The fan allows for easy cleaning of the radiator with its one-minute automatic reverse rotation every 30 operating minutes. In moderate working conditions, this can be manually operated for cleaning as necessary.
Once you have taken delivery of your ZW180PL-5 wheel loader, we want to ensure that it continues to exceed your expectations on the job site. That’s why we provide extensive support to each of our dealers so that every one of our customers can receive first-class after-sales service. To further protect your investment, you can choose from a variety of options within the Hitachi Support Chain program. It gives you the flexibility to create your own service plan from the following key areas – each one represents a link in the chain of service available from Hitachi via your local dealer.

Support Chain

Key features

- Once you have taken delivery of your ZW180PL-5 wheel loader, we want to ensure that it continues to exceed your expectations on the job site.
- To further protect your investment, you can choose from a variety of options within the Hitachi Support Chain program.

Protect your investment with a variety of after-sales options

Global e-Service

The ZWPL-5 wheel loader is equipped with a satellite communication system*. This sends a wide range of machine data to the Hitachi main server. Via the Global e-Service database, you will have remote access to all of this data. All you need is an internet connection and your Global e-Service log-in details.

Global e-Service enables you and your dealer to download and share this data, helping you to remotely manage your fleet. The online facility also helps your dealer to proactively advise you on preventative maintenance and related specials.

The latest information on the ZWPL-5 wheel loader is available 24/7 and includes operational data, such as the number of working hours, fuel consumption figures, working modes and location. This helps you to reduce running costs, plan jobs efficiently and keep up to date with machine maintenance – to ensure optimum performance and minimal downtime.

Technical support

The professional and highly trained Hitachi service team combines the global expertise and knowledge of Hitachi Construction Machinery with your local language and culture. We take a proactive approach towards customer service by continuously training our dealer personnel, so that the available global knowledge is passed on to each individual technician in our dealer network.

Extended warranty and service contracts

Every new Hitachi model is covered by a full manufacturer’s warranty. However, your ZWPL-5 wheel loader may require extra protection due to severe working conditions or to minimise equipment repair costs. To meet these demands, our dealers offer the option of a unique extended warranty program and comprehensive service contracts – the most effective way to optimise the performance of your ZWPL-5 wheel loader.

Parts and Remanufactured Components

Hitachi offers different lines of parts and components to suit your specific needs. In addition to our range of genuine parts, there are other options available:

- For that highly demanding application or climate, Hitachi provides a line of parts with extra performance.
- When you are looking for an economical solution for preventative replacements, remanufactured components are the best option.

Whichever choice you make, you can be assured of the reinforced Hitachi quality and warranty to give you added peace of mind.

Your Hitachi dealer can supply you with more details on each of the above parts lines.

* The satellite communication system is standard equipment for ZW wheel loaders, however, the availability of the communication system depends on licensing regulations in your country. Please contact your Hitachi dealer for more information or to apply for a Global e-Service account.

Key features

- Check each of your machines from your office – 24/7
- Have a remote insight into fuel consumption
- Check the current and previous locations and movements of your machines
- See maintenance status and items due for renewal on each of your machines
- Receive e-mail notifications for any machine alerts, unexpected movements and so on.
## SPECIFICATIONS

### ENGINE
- **Type**: CUMMINS QSB6.7
- **Maximum power**: 112 kW (150 HP) at 2,200 min⁻¹ (rpm)
- **Maximum torque**: 340 Nm at 1,400 min⁻¹ (rpm)
- **Bore and stroke**: 110 mm x 110 mm
- **Combustion Chamber**: Double-acting piston type

### AXLE AND FINAL DRIVE
- **Engine output**: 129 kW (173 HP) at 2,200 min⁻¹ (rpm)
- **Overall length**: 5,380 (17.7 ft)
- **Overall width**: 2,100 (6.9 ft)
- **Overall height**: 3,800 (12.5 ft)
- **Overall weight**: 11,400 (25,130 lb)

### TIRES
- **Height over tires**: 1,810 (5.9 ft)
- **Length over tires**: 2,620 (8.6 ft)
- **Width over tires**: 3,280 (10.8 ft)

### BRAKES
- **Theoretical maximum deceleration**: 3.7 / 3.9 mph
- **Hydraulic oil**: 25.3 / 27.0 km/h

### STEERING SYSTEM
- **Directional Travel**: 80°
- **Load cylinder**: 4-cycle water-cooled, direct injection

### HYDRAULIC SYSTEM
- **Two elements dry type with restriction indicator**
- **Four elements with external output shaft**
- **Bucket weight**: 11,800 (26,020 lb)

### POWER TRAIN
- **Transmission**: 5-speed, forward/reverse
- **Oil filter**: 120 L/min at 2,000 min⁻¹ (rpm)
- **Air cleaner**: 2 x 12 V
- **Air filter**: 2,610 (8.6 ft)

**Machine stability and operating weight depend on counterweight, tire size and other attachments.**
**EQUIPMENT**

**OPERATOR’S STATION**
- Adjustable steering column & POP-UP
- Adjustable seat (x 2) with height adjustment
- Bucket auto leveler (Automatic return to dig control)
- Control lever lock switch
- Dual lift arm auto leveler
- Emergency steering
- Fold-up grab handles (x 2)
- Power window for front (x 2)
- Power window for rear (x 2)
- Retractable seat belt, 75 mm (3.0 in)
- Sun visor
- Textured steering wheel with spinner knob
- Tinted safety glass: others : tempered, windshield : laminated
- Tinted sun visor

**LIGHTS**
- Brake & taillights
- Clearance lights
- Headlights
- Turn signals with hazard switch
- Work lights
- Additional front lights on cab (2)
- Front lights on cab (2)
- Rear lights on rear grille side cover (2)
- Rear lights on cab (2)

**POWER TRAIN**
- Automatic transmission with load sensing system
- Differential
- LSD (Limited Slip Differential, front and rear)
- LSD (Limited Slip Differential, front and rear)
- Forward/reverse lever
- Power mode switch
- Quick power switch
- Shift change delay mode switch
- Speedometer
- Front/rear speed selector

**ENGINE**
- Air intake
- Air filter double elements
- Cartridge type engine oil filter
- Cartridge type fuel pre-filter
- Cartridge type fuel main filter
- Engine oil sensor drain

**ELECTRICAL SYSTEM**
- Battery disconnect switch
- 12 V power outlet

**COOLING SYSTEM**
- Automatic reversible cooling fan with heat sensing
- Fan guard
- Radiator
- Standard for pitch radiator

**MONITORING SYSTEM**
- LCD monitor display: clock, ECO, F-N-R/Shift position, hold, hour meter, coolant temperature, transmission oil temperature
- Warning lights: brake oil low pressure, engine oil low pressure, hydraulic oil level, steering oil low pressure, oil pressure
- Indicator lights: air filter restriction, axle oil temperature, clearance lights, control lever lock, discharge warning, emergency steering, engine warning, fan/reverse, fuel filter restriction, forward/reverse selector switch, high beam, hydraulic oil temperature, maintenance, parking brake, power mode, preheat, seat belt, service, transmission warning, transmission oil temperature, turn signal, water separator, work lights

**MISCELLANEOUS**
- Articulation lock bar
- Belly guard (Stock on type)
- Counterweight
- Drawbar with locking pin
- Emergency steering
- Fenders
- for 20.5 R25
- Front & full covered rear fenders with mud flaps
- Global e-Service
- Lift arm
- Lift arm, attachment
- Lift & tie down hooks
- Lockable engine cover
- Lockable fuel refilling cap
- Quick coupler (Volvo compatible)
- Standard and optional equipment may vary by country, so please consult your Hitachi dealer for details.

---

**THERMAL SYSTEM**
- Automatic reversible cooling fan with heat sensing
- Fan guard
- Radiator
- Standard for pitch radiator

**COOLING SYSTEM**
- Automatic reversible cooling fan with heat sensing
- Fan guard
- Radiator
- Standard for pitch radiator

**MONITORING SYSTEM**
- LCD monitor display: clock, ECO, F-N-R/Shift position, hold, hour meter, coolant temperature, transmission oil temperature
- Warning lights: brake oil low pressure, engine oil low pressure, hydraulic oil level, steering oil low pressure, overheat
- Indicator lights: air filter restriction, axle oil temperature, clearance lights, control lever lock, discharge warning, emergency steering, engine warning, fan/reverse, fuel filter restriction, forward/reverse selector switch, high beam, hydraulic oil temperature, maintenance, parking brake, power mode, preheat, seat belt, service, transmission warning, transmission oil temperature, turn signal, water separator, work lights

Built on the foundation of superb technological capabilities, Hitachi Construction Machinery is committed to providing leading-edge solutions and services to contribute as a reliable partner to the business of customers worldwide.

Prior to operating this machine, including communication system, in a country other than a country of its intended use, it may be necessary to make modifications to it so that it complies with the local regulatory standards (including safety standards) and legal requirements of that particular country. Please do not export or operate this machine outside the country of its intended use until such compliance has been confirmed. Please contact your Hitachi dealer in case of questions about compliance.

These specifications are subject to change without notice.

Hitachi Environmental Vision 2025

The Hitachi Group released the Environmental Vision 2025 to curb annual carbon dioxide emissions. The Group is committed to global production while reducing environmental impact in life cycles of all products, and realizing a sustainable society by tackling three goals — prevention of global warming, recycling of resources, and enhancement of ecosystem.

Reducing Environmental Impact by ZW

Hitachi makes a green way to cut carbon emissions for global warming prevention according to LCA*. ZW utilizes lots of technological advances, including the standard mode which optimize fuel efficiency. Hitachi has long been committed to recycling of components, such as aluminum parts in radiators and oil cooler. Resin parts are marked for recycling.

*Life Cycle Assessment – ISO 14040

Illustrations and photos show the standard models, and may or may not include optional equipment, accessories, customer installed and modified parts, optional parts and all standard equipment with some differences in color and features. Before use, read and understand the Operator’s Manual for proper operation.
