

Forehead Temperature Detection, Facial Recognition Terminals

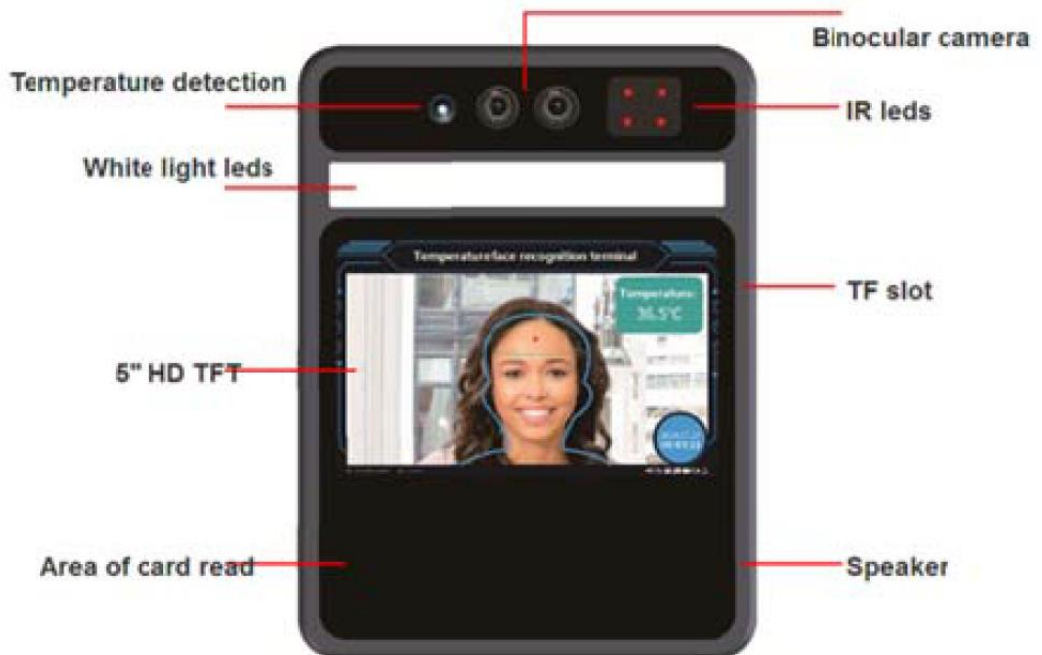

5" version with integrated screen and optional facial recognition

Available in:

- wall mount version
- table mount version
- floor mount version
- Portable version which includes a 20h battery and a pelican case

Wall mounted 5"

PRT-5MFTD – WM = 2728\$

Forehead Temperature Detection, Facial Recognition Terminals

Product features:

- * 2MP HD video, integrated face capture and recognition
- * Non-contact body temperature detection within one second
- * Forehead temperature testing distance: 25-40cm
- * Temperature detection error range +/- 0.3C
- * Abnormal temperature triggers audible alarm and relay alarm output
- * Double sensor design, infrared vivo detection algorithm prevents photo and video fraud
- * The face recognition distance is within 0.5-3 meters
- * With the deep learning algorithm, supports a 10,000 face database
- * Provide RS485, I/O input and output, Wigan and other peripheral interfaces.

5" version with integrated screen and optional facial recognition

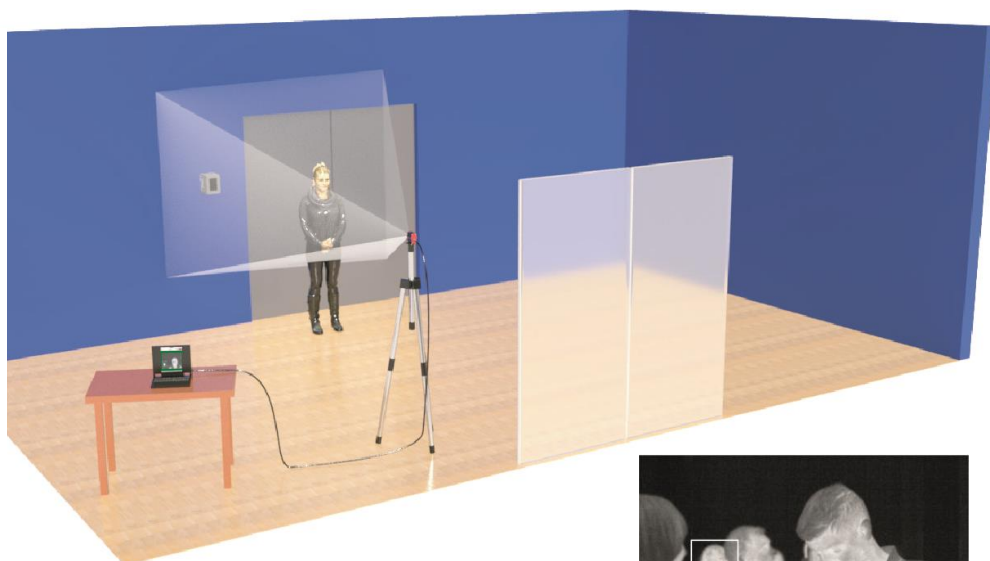

Available in:

- table mount version
- floor mount version
- portable version which includes a 20h battery and a pelican case

7" table mount version

Infrared Temperature Screening System

Key Applications: Airports, Railway stations, Schools, Universities, Industrial plant, Warehouses, Office, Buildings and others.

Key Benefits:

Instant non-intrusive measurement using infrared thermal imaging technology with market-lead temperature measurement accuracy.

Monitors for high temperature without slowing down the flow of people.

Fixed remote measurement removes the risk of infection transmission to operators.

Complete On-line System Solution works out of the box and is simple to operate.

Quick and easy to install and re-locate as required with standard camera fitting for flexible mounting options.

Automatic alert function reduces potential for human error and immediately alerts the operator if trigger point reached.
