

Global Sustainability Activities: Post-Program

Activity 2: Out-of-the-Box Worksheet

What environmental problem are you most worried about?

Are you able to find any organization, group, or company that is doing anything unique or creative to address this issue? Has it greatly improved the environmental problem that you're worried about, or is there a lot more work to be done?

If you had all the money, influence and cooperation you needed, what kind of creative and "out-of-the-box" solution would you create?
