

## Wisdom To Wealth Mastery - Web Wisdom

Discomfort, fear, whatever you wish to call it, is very common, when faced with creating video and being on camera.

Public speaking is the #1 fear for many.

As mentioned before, the discomforts are -

Being on camera - men are more comfortable being on camera but almost all women immediately react with the words "I need to lose 10 lbs" or "Not with my hair like this", which holds them back from reaping the many benefits and opportunities of video.

If it is any consolation, I still have that reaction, after creating videos for years, but today, you literally cannot afford to ignore video, if you are in business.

I just say to myself "Too bad, I need video, so here goes" and click the record button and put on a big smile!

Technology The second "discomfort" which prevents people creating video is the thought of the tech, but now, the tech has come down to "Push the red button once, deliver your message, Push the red button again" and your video is created.

HD TV Studio in Your Purse Thirdly, you have a smartphone in your purse. This is not only a phone. This is a complete HD TV Studio, which records great quality video and in all likelihood, your HD TV Studio is within your reach at any time.

Calling the miracle in your purse a phone, diminishes it and few realize the power of this miracle they carry around with them which can change their lives.

Purse Power is a complete online course, taking you, click by click, from -
