

# Reincarnation Demands The Universe Must Bounce (Steady State Theory)

Reincarnation writings prophecy the universe renews itself (bounces) every 20-30 million years.

The Problem: Universe has a very poor work efficiency:

$1/_{100}$  of a Millionth of 1%

UNIVERSAL RENEWAL OR BOUNCING  
IS SCIENTIFICALLY AN IMPOSSIBILITY!!!

$10^{157}$   $\frac{1}{2}$ " marbles = 5,184 cubic miles of marbles

Builds a road 38 feet thick x 3 miles wide x 240,000 miles long; long enough to reach the moon

It would take 7 billion people (everyone alive on earth) counting 4 marbles per second 24 hours a day, 2,939,571,428,571 years (almost 3 trillion years) to count them.

If you made this road all WHITE marbles except for one RED marble, 1 in  $10^{157}$  is the chances that one blindfolded man would pick up the RED marble on the first try
