VP of Engineering, Cyrus Biotechnology (Present)

- I am fortunate to be in a position of leadership for all software engineering process, team management, and technical architecture.
- We build software bleeding edge software in Kubernetes on Google Cloud and AWS with SAM, powered by Rosetta. [Cyrus Bench](#), and our upcoming product *Cyrus Engine*; the most powerful and validated protein design software in molecular discovery.

Director of Engineering, Sterling TS (Dec 2016 – Aug 2018)

- Leader of four key teams (Platform, API, Global, and “Special Projects”) of 25+ engineers, designers, architects, and developers.
- Led migration from bare-metal to AWS (7 figure AWS spend). Created and ran continuous-education across all teams globally for AWS Certification and other ongoing learnings with weekly “Lunch & Learn” sessions.
- Helped architect and implement GDPR and various other security standards.
- Led microservices transformation across Bellevue/Atlanta offices of >100 engineers.

Software Development Director, Fresh Consulting (Nov 2015 – Apr 2017)

- Technical leader; implemented unique agile flavors for each of the 8+ teams; change agent for best practices on security, architecture (AWS, Azure) and testing disciplines.
- Some key projects included bandofhands.com, trutinafinancial.com, talkingrain.com, cbredev.com (Market Builder, Market Broker), benbridge.com, inventvalue.com, and technologystack.com.

Vice President, Technology, Vennli (Feb 2013 – Nov 2015)

- One of four founding members of the company. Recruiting, team management, and executive partnership for fundraising, product development, sales/marketing, and research.

SKILLS

Technical Leadership
 Agile Development
 Technical Recruiting
 Product Development
 Cloud Architecture
 Software Architecture
 Software Engineering

CERTIFICATIONS

aws  **CERTIFIED**

(WIP) Certified Kubernetes Administrator

(WIP) Google Cloud Engineer

FRAMEWORKS / DEV

React.js
 Node.js
 Serverless
 Kubernetes
 Symfony/Laravel
 AWS
 Azure

CAPABLE

Spring, spring-boot
 Python (django)
 Go
 C#

- Technical and product leadership of two engineering/design teams building flagship product.
- Assisted with fundraising and marketing by demonstrating technical leadership and architecture on various webinars, chats, and conferences.

Software Engineer III, DLS Internet (Jul 2009 – Feb 2013)

- Led small team building the interface and reporting tools for pbx.dls.net (now TelephonyYourWay.com) using jQuery, jQuery-UI.
- Assisted in provisioning and automating processes for onboarding new clients.
- Managed and developed automating billing processes via Quickbase, banking institutions, and subscription billing services.
- Initiated all efforts to move from legacy PHP3 to WordPress for all internal intranet and internet properties.

Principal, Zoadilack (Dec 2006 – Current)

- Freelance software/website consultant building custom websites and applications; particularly ecommerce or marketing websites.
- Ad-hoc recruit and hire sub-contractors to assist with large scale projects.
