

# EZ AzonCartLink WP Plugin

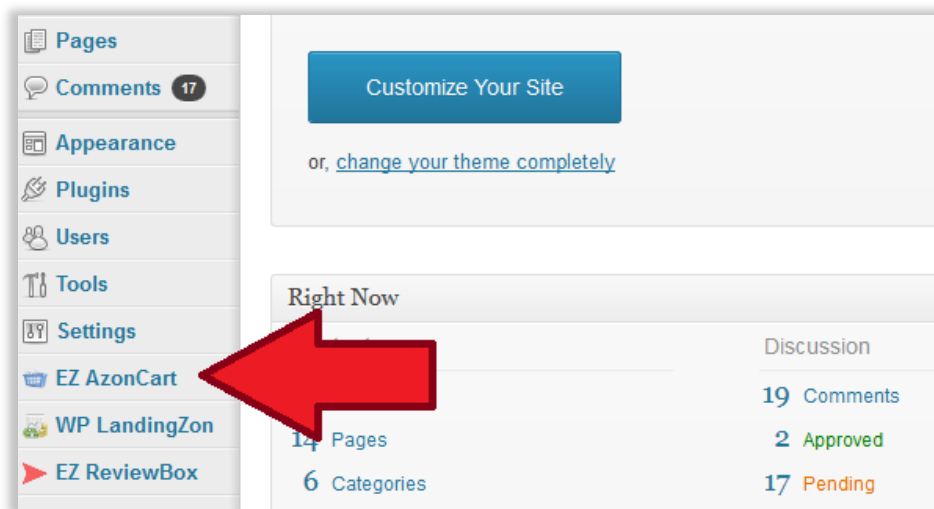

## Tutorials and User Guide

### 1.) Installing The Plugin

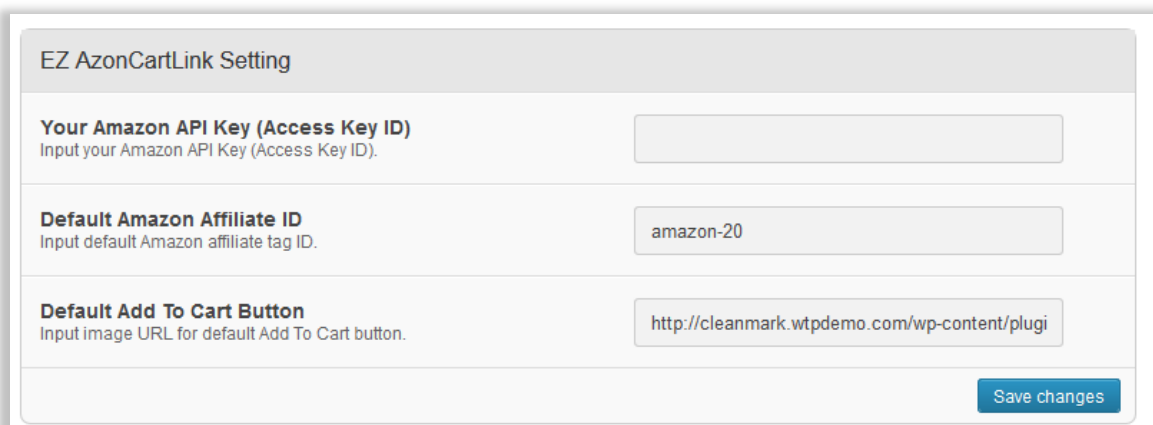

From your WP Admin Dashboard, click the Plugins menu on the left side. Then select Add New -> Upload.

Browse the plugin, install and activate it.

Once you activated the plugin, please visit the “EZ AzonCart” menu first.

On this EZ AzonCart plugin settings page, there are 3 options:

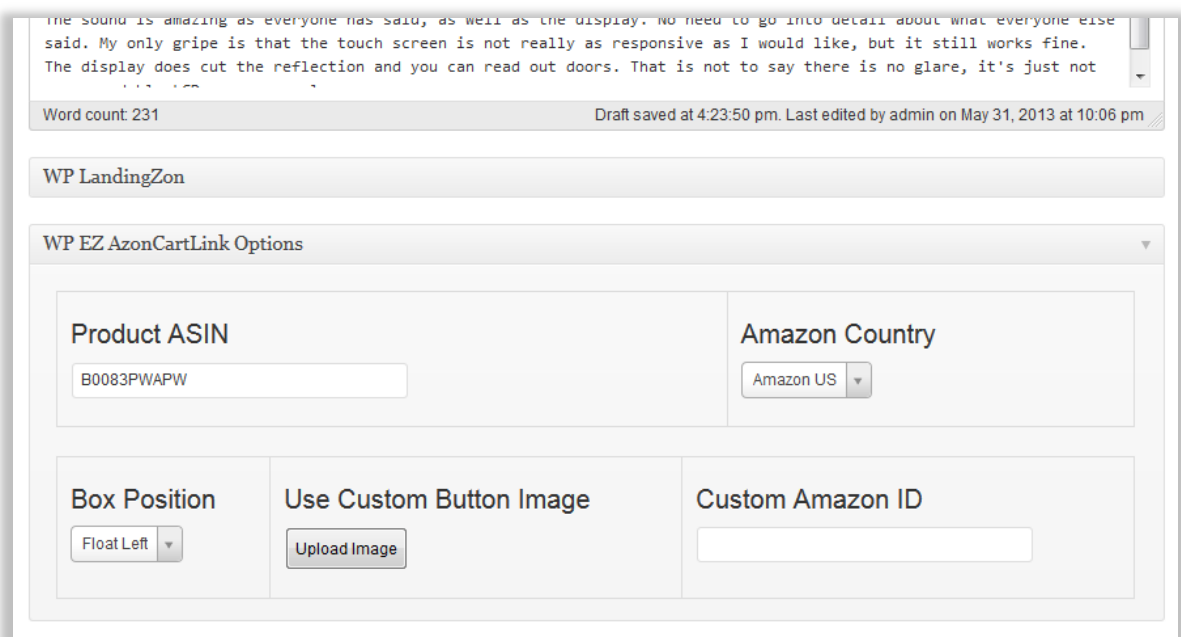

A screenshot of the 'EZ AzonCartLink Setting' page. It features three configuration options, each with a label, a description, and an input field. The first option is 'Your Amazon API Key (Access Key ID)' with the instruction 'Input your Amazon API Key (Access Key ID)'. The second option is 'Default Amazon Affiliate ID' with the instruction 'Input default Amazon affiliate tag ID.' and the value 'amazon-20'. The third option is 'Default Add To Cart Button' with the instruction 'Input image URL for default Add To Cart button.' and the value 'http://cleanmark.wtpdemo.com/wp-content/plugi'. A 'Save changes' button is located at the bottom right of the form.

The first 2 options are mandatory, you need to input your Amazon API Key and your Amazon Affiliate ID (Amazon tag).

On that page you can also set the default Add To Cart button image, this is optional because you can use a custom button on each Post or Pages.

## 2.) Adding EZ AzonCart On Posts/Pages

To add the EZ AzonCart on your WordPress posts or pages, when you're creating or editing posts/pages scroll the page down a little bit and you will find EZ AzonCart options below the post editor:

The screenshot shows the WordPress post editor interface. At the top, there is a text area with a sample paragraph about a product. Below the text area, a status bar indicates 'Word count: 231' and 'Draft saved at 4:23:50 pm. Last edited by admin on May 31, 2013 at 10:06 pm'. Below the status bar is a meta box titled 'WP LandingZon'. Inside this meta box is another meta box titled 'WP EZ AzonCartLink Options'. This box contains several fields: 'Product ASIN' with a text input field containing 'B0083PWAPW'; 'Amazon Country' with a dropdown menu showing 'Amazon US'; 'Box Position' with a dropdown menu showing 'Float Left'; 'Use Custom Button Image' with an 'Upload Image' button; and 'Custom Amazon ID' with a text input field.

Enter the ASIN of Amazon product you want to promote, then select where is that product available. Example if it is on Amazon.com then you should select "Amazon US" on the Amazon Country selection field.

After that, you can add EZ AzonCart into your posts or pages by adding this custom field on post editor:

**[ezazoncart]**

You can select also the position whether you want it to be Centered, Floating Left/Right, etc.

And you can also overwrite the default Amazon Affiliate ID and Add To Cart button image that you set on the plugin setting page.

WP EZ AzonCartLink Options

<b>Product ASIN</b> <input type="text" value="B0083PWAPW"/>		<b>Amazon Country</b> <input type="text" value="Amazon US"/>
<b>Box Position</b> <input type="text" value="Float Left"/>	<b>Use Custom Button Image</b> <input type="button" value="Upload Image"/>	<b>Custom Amazon ID</b> <input type="text"/>

 **If you want to overwrite the default Add To Cart button, select here to upload new image or use existing one..**

 **Overwrite the default Amazon Affiliate ID.**

Because you can overwrite the default Amazon Affiliate ID, it means you can promote products from different Amazon locales in one blog/website.
