

Reddit

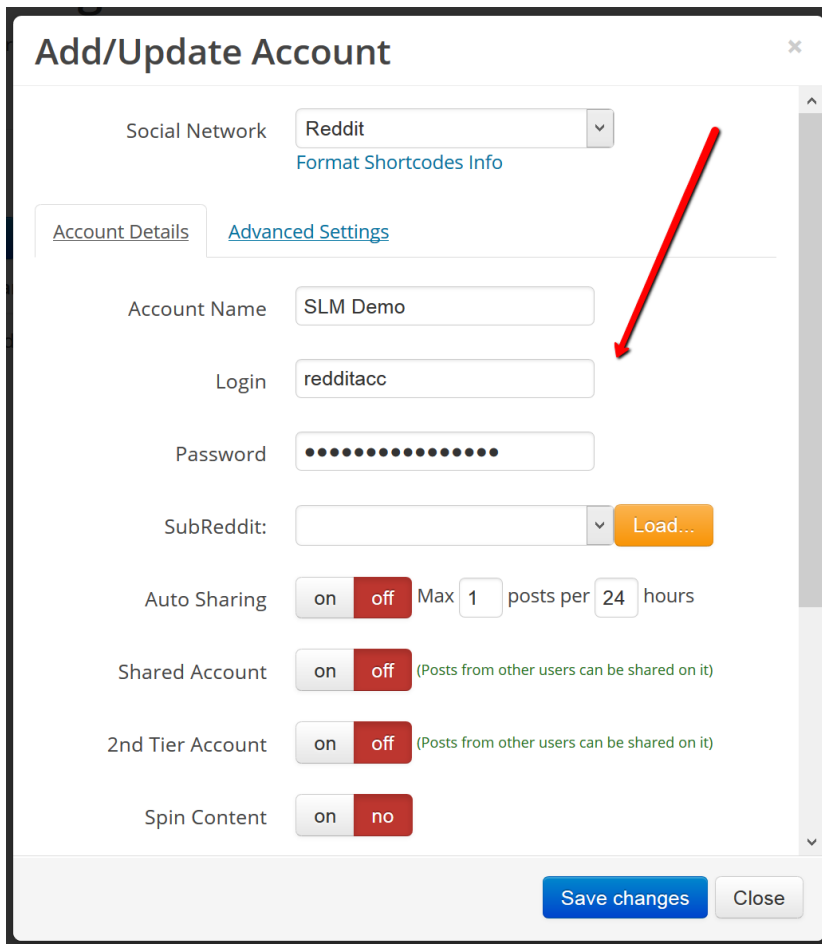

Notes:

- *Reddit allows automated posting only to accounts with high Karma. If you do not have such account then you either need to grow Karma yourself, which can take a lot of time or to get accounts with Karma on Fiverr.com*

1. Register at and login at <http://www.reddit.com/>
2. Create your own SubReddit at <https://www.reddit.com/subreddits/create>
3. Go to your Wordpress Dashboard and click 'Add Account':

4. Select 'Reddit' as account type, fill necessary information and click:

The screenshot shows a web form titled "Add/Update Account". At the top, "Social Network" is set to "Reddit" with a dropdown arrow. Below it are links for "Format Shortcodes" and "Info". The form has two tabs: "Account Details" (active) and "Advanced Settings". Under "Account Details", the "Account Name" is "SLM Demo", "Login" is "redditacc", and "Password" is masked with dots. The "SubReddit:" field is empty with a dropdown arrow and a "Load..." button. Below this are several toggle switches: "Auto Sharing" (on/off), "Shared Account" (on/off), "2nd Tier Account" (on/off), and "Spin Content" (on/no). The "Auto Sharing" section includes "Max 1 posts per 24 hours". At the bottom are "Save changes" and "Close" buttons. A red arrow points from the top right towards the "Login" field.

5. Load and Select a SubReddit by clicking 'Load' button:

This is a close-up of the "SubReddit:" section of the form. It shows an empty text input field with a dropdown arrow, followed by a "Load..." button. A red arrow points from the top right towards the dropdown arrow, and another red arrow points from the top right towards the "Load..." button.

6. Save account.
