Computer Science Education Week

December 6 – December 11, 2021

High School students & their loved ones are invited to attend a series of virtual events run by the University of Washington Allen School

Example Activities:

Robot-Assisted Feeding Demo with Q&A
Join our demo to learn about how a robot can help feed people with mobility impairments! You will get to see a robot in action and learn about the challenges of developing assistive robots.

A Day in the Life of a CS Student
Learn from Allen School students about what it’s like to be a college student studying computing! We will discuss classroom experiences, extracurriculars, and more! We will wrap up with Q&A from attendees.

Prospective Student Information Session
This presentation is intended for high school students who are interested in applying to the Allen School. We will provide an overview of the application process and incorporate information about Allen School student life and experiences.

Check out our webpage for more Ed Week Activities and Events!
