

SPECIFIC INFORMATION FOR Q TOWER FITS

HOW TO FIND YOUR VEHICLE'S FOUR Q TOWER MEASUREMENTS (M_s)

YAKIMA RACK SYSTEMS THAT USE Q TOWERS REQUIRE FOUR MEASUREMENTS (4M_s). THESE GIVE PLACEMENT POINTS FOR Q TOWERS.

- You can find measurements at www.FitLookup.Yakima.com
- Read across the Fit List table to find your car's 4 M measurements.
- Write the appropriate 4 M measurements in the spaces on your Q Tower instruction sheet.

M1 Front: tower-to-tower

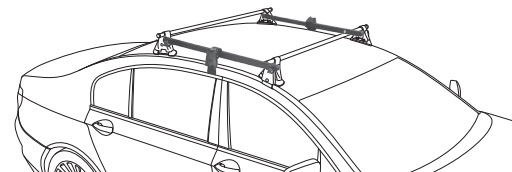

M2 From inside corner of roof (paint) to front tower

M3 Rear: tower-to-tower

M4 Crossbar spread (center to center)

TAKE NOTE OF VARIATIONS which may include...

Q STRETCH KIT: The Q Stretch Kit Option allows a longer crossbar spread and requires a different set of 4M measurements.

MAX CROSSBAR SPREAD: Specified on vehicles with adjustable Crossbar spread or Q Tower fits with optional rear bar placement. Follow your 4 M Measurements for that measurement.

ABOUT MOVING YOUR Q TOWERS TO A NEW VEHICLE—IMPORTANT!

Q TOWER IDENTIFICATION—NOTE 180 EXPLAINED

- If your Q Tower was purchased in or before 2004, it is likely that you may have Q Tower model number 8000105/8000112.
- View the Q Tower images at right to identify your tower (8000105/8000112 or 8000124/8000135).
- If you have model number 8000105/8000112 and are fitting a vehicle that has fit note #180, then you will need to upgrade to model 8000124 or 8000135.
- Contact Yakima at 888-925-4621 for your Q Clips (free with purchase of new Q Towers) to make your upgrade and fit smoother.
